About Me

Experienced in developing applications and solutions for a wide range of clients, having the enthusiasm and ambition to complete projects to the highest standard of quality. Seeking a challenging environment that encourages continuous learning and creativity, which provides exposure to new ideas and stimulates personal and professional growth.

Education :

- B-Tech (Information Technology) |KIET Group of Institutions (2018-2022)
- HSC | VN Government Inter Collage Gyanpur Bhadohi (2016-2017)
- SSC| MKAN Singh Vidya Sansthan Gyanpur Bhadohi (2014-2015)

Professional Experience

- » MobCoder - Software Engineer(Jan 2022 to Present)
 - o Build Different types of Apps in React Native
 - o Integrate 3rd party library
 - o Push notifications(FCM)
 - o Integrate native SDK
 - o Implement google maps
 - o Integrate Gateway
 - o

Technical Expertise

- » 2+ years of total experience of Hybrid application development using React Native with a good track of problem-solving skills and ability to work individually on applications from inception to transition.
- » Major expertise in React Native, JavaScript, typescript, integration 3rd party library, Redux
- » Proficient in client communication & overall development phases.

React Native

- » Making learning for user an easy way with the help of smooth animations
- » Attractive and smooth carousel with smooth and animated pagination
- » UI/UX Design: Skilled in implementing intuitive and visually appealing user interfaces for mobile apps.
- » JavaScript/TypeScript: Strong command over JavaScript and TypeScript programming languages, essential for React Native development.
- » Redux/Context API: Experienced in state management using Redux and React Context API for large-scale applications.
- » Animated splash screen on application startup
- » Navigation Libraries: Familiarity with React Navigation and other navigation libraries for seamless navigation between screens.
- » Push Notifications: Knowledgeable about implementing push notifications using Firebase Cloud Messaging (FCM) or other services.
- » Third-Party Libraries: Proficient in integrating and customizing third-party libraries to add functionalities such as maps, authentication, and analytics.
- » Debugging and Testing: Skilled in debugging React Native applications and writing unit and integration tests for robust code.
- » Performance Optimization: Capable of optimizing React Native apps for better performance, including reducing bundle size, improving rendering speed, and minimizing memory usage.
- » Version Control: Proficient in using Git and GitHub for version control and collaboration in team projects.

Technology

- » React Native, React JS,HTML,CSS,OOPS
- » JavaScript
- » Typescript
- » Push notification(FCM)
- » 3rd Party API integration.
- » Restful API.
- » Redux, Redux toolkit.

- » Payment gateway
- » Native modules.
- » Social login(Google, facebook)
- » Third party SDK (FaceTec,Verisoul)

Project Details:

Kresus Super App :

Kresus is a platform where user buy and sale crypto currency and also manage own wallet or we buy NFT as well.kresus app provide vault feature as well in the vault kresus provide guardian or trustee as well guardian like a parent without guardian permission do not withdraw from vault trustee is like nominee.

Kresus manages 4 types of token eth,erc20,erc720,erc1155.

Role: React Native developer

Responsibilities:

- Developed and maintained cross-platform mobile application using React Native framework.
- Collaborated with UI/UX designers and backend developers to ensure seamless integration of front-end and back-end components.
- Conducted code reviews, debugging, and performance optimization to deliver high-quality, efficient code.
- Worked on Native modules for react native app
- Implemented Notifications(FCM) and implement Bio auth using varisoul and Feactec
- Implement Error Boundary
- Worked on Animation as well
- Implement payment gateway

Technology Stack:

- » React Native
- » Style Sheets
- » Third party libraries
- » Java
- » BlockChain

Duration : 12 Months

Saathi :

This project is an e-commerce app for pharmacists that deals with bulk orders of medicine. This application aims at providing medicines to rural areas through people called 'Saathi'.

Role: React Native developer

Responsibilities:

- Developed and maintained cross-platform mobile application using React Native framework.
- Collaborated with UI/UX designers and backend developers to ensure seamless integration of front-end and back-end components.
- Conducted code reviews, debugging, and performance optimization to deliver high-quality, efficient code.
- Worked on Native modules for react native app
- Implemented Notifications(FCM)
- Implement Error Boundary
- Worked on Animation as well

Technology Stack:

- » React Native
- » Style Sheets
- » Third party libraries
- » ROR

Duration : 10 Months

Wyvate :

This Project is an appointment type for restaurants currently .This app can be a great tool for both customers and restaurant owners to manage their reserva- tions, orders, and payments. With the right technology stack and development team, this app can be developed quickly and efficiently, providing a seamless experience for customers and restaurant owners.

Role: React Native developer

Responsibilities:

- Developed and maintained cross-platform mobile application using React Native framework.
- Collaborated with UI/UX designers and backend developers to ensure seamless integration of front-end and back-end components.
- Conducted code reviews, debugging, and performance optimization to deliver high-quality, efficient code.
- Worked on Native modules for react native app
- Implemented Notifications(FCM)
- Implement Error Boundary
- Worked on Animation as well

Technology Stack:

- » React Native
- » Style Sheets
- » Third party libraries

Duration : 6 Months
