## Skills

---

**Languages:** SQL, Python, UNIX

**Technologies & Tools:** ETL, Ab Initio, Teradata SQL Assistance, Microsoft SQL Server, Power BI, Datawarehousing.

**Soft Skills:** Strong business analytical understanding, BFSI domain knowledge, Effective verbal communication.

## Work Experience

---

**Right Avenue Infotech, Bangalore**

March 2022 – Sept 2023

### **Technical Business Analyst**

- Collaborated with stakeholders to create a project initiation document, leading to a 25% decrease in project scope creep and enhanced project deliverable clarity.
- Creating a comprehensive project definition or project initiation document to precisely outline the scope and objectives of the project.
- Facilitating end-to-end requirements processes, including BRD, FRD, SRS documentation, leads to improved communication and faster project initiation.
- Exceptional problem-solving skills: Proficient in analyzing complex problems, identifying root causes, and implementing effective solutions to drive positive outcomes
- Keen attention to detail: Meticulous and thorough in examining information, ensuring accuracy and completeness in all tasks and projects.
- Enhanced data migration accuracy by implementing ETL best practices, leading to improved data quality and more reliable business insights.
- Developed and implemented optimization strategies using Hive (Hadoop), Teradata, Ab Initio, GitHub, and Microsoft Office tools, resulting in improved data management and collaboration across platforms.
- Performing user acceptance and system test script execution while maintaining awareness of project risks, issues, assumptions, and dependencies.
- Proficient in change control processes, particularly as they pertain to requirements documentation.

## Education

---

**Maharishi University of Information Technology**

Master in Business Administration (MBA)

Aug 2019 - Jun 2021

**CGPA:7.7/10**

**Amity University**

B.Tech in Civil Engineering

Aug 2014 - Jun 2018

**CGPA:8.26/10**

## Project Work

---

**Cheif Data Analytics Office** – End-to-End Data Management and Analytics Leadership for Comprehensive Business Insights.

- Analyzed and documented detailed functional and non-functional requirements, resulting in a 20% increase in process efficiency. Enhanced data integrity and quality through collaboration with data stakeholders.
- Resolving complex requirement conflicts through effective stakeholder engagement.
- Utilized ETL technology, specifically Ab Initio and Microsoft SQL Server Integration Services (SSIS), to design, develop, and implement data integration solutions.
- Designed and optimized ETL processes to ensure efficient extraction, transformation, and loading of data from diverse sources into target systems.
- Conducted data profiling and analysis to identify data quality issues and implement data cleansing and transformation strategies.
- Worked closely with database developers and administrators to seamlessly integrate ETL processes, including MBLT, Metadata Rapid Testing, and DIL, using Ab Initio.
- Collaborated with cross-functional teams to analyze business needs and recommend improvements to data integration processes and systems.
- Utilized SQL to query and analyze large datasets, extracting relevant business insights and providing actionable recommendations.
