

Akshant

I specialize in business process optimization with over 2 years of experience in software development for cheque clearing and automated clearing house systems at a product-based company. My strengths include analyzing business operations, devising and implementing process improvement strategies, and utilizing technology to enhance workflow efficiency through strategic decision-making.

- Analytical Skills & Critical Thinking

Experience

Feb'2022 - Present

Image infosystems Pvt Ltd, New Delhi

Quality Assurance Specialist

- Devised an overall strategy for documentation and identified all possibilities during the development stages of applications.
- Demonstrated the application to new clients and ensured it fulfilled all requirements of their bank.
- Prepared Software Requirements Specification (SRS) and Functional Specification Document (FSD) for Cheque Truncate System (CTS), Value Added Tax (VAT), and Automated Clearing House (ACH) applications for clients including HDFC, IDFC, Yes Bank, Dubai Islamic Bank, BDO Philippines, and Security Bank Philippines.
- Worked closely with banking teams to streamline application deployment and conduct User Acceptance Testing (UAT) within banking environments, ensuring software meets user needs and expectations.
- Currently working on the Software Requirements Specification (SRS) for Emirates NBD's Egypt bank as part of the CTS Project, focusing on detailed system requirements and project scope.
- Led cross-functional teams in the implementation of Agile methodologies, resulting in improved project transparency and faster delivery cycles.
- Conducted regular stakeholder meetings to gather feedback and ensure alignment with project goals and client expectations.
- Collaborated with product management to prioritize feature development based on market trends and client feedback.

August'2021 - Feb'2022

VTS Infosoft Pvt Ltd, Noida

Quality Analyst

- Conducted thorough testing and validation of ERP modules to ensure functionality, reliability, and user satisfaction.
- Developed and executed comprehensive test plans, test cases, and test scripts for ERP system implementations, upgrades, and patches.
- Performed regression testing to verify the stability of existing functionalities after changes or enhancements.
- Collaborated closely with cross-functional teams including developers, business analysts, and end-users to identify issues and drive resolution.

Achievement

- Recognized for expertise in gathering requirements and preparing Functional Specification Documents (FSD) for new changes in CTS applications of DIB bank dubai. Managed projects and coordinated seamlessly with development teams and testing units to deliver comprehensive application updates to banks. Orchestrated User Acceptance Testing (UAT) within bank environments, ensuring alignment with client specifications and operational needs.
