# AYUSH ARUN

Noida, Uttarpradesh

#### **&** 8809583554

#### EDUCATION

**GNIOT GROUP OF INSTITUTION** BTech - CGPA - 7.19

MLSM COLLEGE DARBHANGA

12th - PCM - Percentage - 75%

#### TECHNICAL SKILLS

Languages: Java, JavaScript Development: HTML, CSS, JavaScript, React Js, MongoDB, Express Js Developer Tools: VS Code, Git, Vercel, Netlify, Github

#### EXPERIENCE

#### RMSI PVT. LTD.

GIS Engineer Trainee

- Use GIS software to design and produce detailed maps that represent spatial data visually.
- Label and categorize geographic data to ensure accurate representation of features such as roads, buildings, and natural landscapes.
- Ensure precision and accuracy in data mapping through careful validation and quality control.
- Analyze spatial data to identify patterns, trends, and relationships.

#### PROJECTS

#### Full Stack Restaurants App C | React Js, Express Js, MongoDB

- Developed a comprehensive full stack restaurant website using **React.js** for the front end, **Express.**js for the backend, and MongoDB for database operations.
- Engineered responsive and aesthetically pleasing front-end interfaces with **React.is**, enhancing customer interaction and satisfaction.
- Worked closely with **UI/UX** designs to ensure the website was intuitive and easy to navigate, improving overall user engagement and retention.
- Utilized **MongoDB** to store and manage restaurant data, including menu items, and user profiles.

## Full Stack Event Planning Application C | React Js, Express Js, MongoDB

- Developed a full stack event planning website utilizing **React.js** for the front end, **Express.js** for the backend, and **MongoDB** for database management.
- Implemented responsive user interfaces with React.js to provide an intuitive and engaging experience for event organizers and attendees.
- Utilized Express is to build a robust backend server, handling event creation, and data management functionalities.
- Integrated MongoDB as the database solution to efficiently store and retrieve event details, user profiles, and other relevant data.

## COMPUTER SCIENCE FUNDAMENTALS
