### Career history

#### Fullstack Developer at OmeletApp

2020 – Present

<https://www.omeletapp.com/>

<https://play.google.com/store/apps/details?id=com.omelet.app>

<https://apps.apple.com/nl/app/omelet-app/id1536334390?l=en>

OmeletApp is a start-up, based in Utrecht Netherlands, in the food delivery, linking chef directly to customers.

- Lead developer backend & frontend.
- Using Ionic & angular to develop the hybrid app and website.
- Backend using Azure functions in Nodejs, database using CosmosDB/MongoDB.
- CI/CD pipeline using Azure DevOps.
- Developed using scrum methodology.

#### Senior Web Developer at KHOOLOOD s.a.l

2017 – 2020

Khoolood is a start-up; our goal is to shift the listing of obituaries and commemorations from newspaper to digital.

- Coordinated deployment of new features like node.js for push notifications and ensured quality through beta link testing.
- Integrated applications by designing database architecture and server scripting as well as studying and establishing connectivity with network systems, search engines and information servers.
- Defined web app objectives and significantly improved UI/UX by analysing user requirements and envisioning system features and functionality.
- Designed and developed user interfaces for web applications by setting expectations and features priorities throughout development life cycle (design methodology, tools set, programming languages, QA/testing).
- Collaborated with third party to create and maintain robust framework to support apps/websites.
