EXPERIENCE

KPMG

Senior Consultant, Financial Management Consulting

Dublin, Ireland

Apr '19 – Current

- Proficiently leveraged financial modelling expertise to optimize the Separated Accounting (SA) process alongside the creation of the required SA templates (SA, AFS, AFI) and accompanying forecast for Ireland's largest infrastructural project since rural electrification.
 - Developed and documented a framework incorporating accounting and cost allocation principles, attribution methods, transfer charging system/ methodology for the Separated and Regulatory Accounts whilst conducting workshops to ensure future proofing of ERP requirements/ Company MIS.
- Utilised advanced financial modelling techniques to conduct a series of economic studies for one of Saudi Arabia's Government bodies.
 - Comprised and presented analysis of sector development, regulatory environment, economic value of said sector for direct and indirect contributions, determine cost per main components to analyse final service cost and benchmark with best practices.
 - Constructed and presented an econometric GDP Contribution Model ensuring complete capture of GDP impact using a "Cross Sector" vision, accounting for the direct and indirect actual contribution of the sector into the GDP of the state.
- Investigative analysis of historical mortgage data, identifying potential risks and opportunities for optimization
 - Leveraged advanced Excel functions, formulas, and macros to streamline complex calculations whilst implementing robust data validation mechanisms and visualisation techniques to mitigate risks, improve efficiency and concisely present findings.
- Provided strategic review, risk assurance, risk analysis, financial management support to electricity network asset owner in its end-to-end legal requirement under the "Electricity Costs Emergency Benefit Scheme".

Dell Financial Services, Dell Technologies

Analyst, Financial Analysis & Pricing

Texas, USA

May '18 – Apr '19

- Structured financing and leasing solutions for global customers, building cash flow streams to meet internal return on equity and profitability thresholds as well as external customer budget and operating lease treatment at customer's internal borrowing rate.
- Reported various portfolio analytics ranging from official track data to forward looking risk estimates for global customers.
- Reviewed and implemented fully new intra-company subsidy process after a financial investigation into escalations, resolving compensation impacts to the value of \$46 million.
- Designed and created quantitative refinancing model for Sales Teams to gain visibility in relation to deal economics - later implemented to established deal and subsidy process in North America after a series of explanation working sessions.
- Conducted in-depth FX market analysis, focusing on price action which was used to aid sales and trading effort.
