## SKILLS

- User Interface Design.
- User Experience design.
- Software development.
- Version control.
- Status tracking tools.
- Prototyping tools
- Problem-solving
- Knowledge of web standards.
- Wireframing.
- Coding.
- Critical thinking.
- Active Listening.
- Adaptability.
- Continuous Learning.
- Digital Marketing.

## PROJECTS

---

### Tour Management System

#### Software Engineer

- Implemented website, mobile application, and landing pages.
- Standardized all output with a new responsive approach and strategy.
- Addressed UI and UX designs for technical feasibility.

### Jenkins CI CD Project

#### DevOps Engineer

- Designed and implemented Jenkins CI/CD pipelines to automate the processes.
- Integrated Jenkins with version control system like Git to trigger builds and deployments.
- Collaborated with cross-functional teams.

### Classifier Model to detect kinds of comments

#### Data Collection and Implementation

- Explored and experimented with various machine learning algorithms.
- Documented the project's methodologies, findings, and technical details.

**Key responsibilities:** Maintaining, optimizing, troubleshooting, Testing, Documentation, Collaboration, Problem-solving, Conceptualizing, Wireframing, Prototyping, Test, User interface (UI) design, User experience (UX) design, Confluence, Jira, Jenkins CI/CD, Git.

## EDUCATION

---

### High School

His Highness Shaikh Rashid Al Maktoum School & Collage, Dubai, UAE.

Completion: 2019

### Bachelor's Degree in Software Engineering.

Beaconhouse National University, Lahore, Pakistan.

Completion: 2023

Relevant courses: Programming fundamentals, Web system development, Human computer interaction, Software quality engineering, SDLC, Software engineering ethics, Software construction and development, Software design and architecture, Software requirement engineering, Typography, Object-oriented programming, Mobile application computing.
