#### Laravel 8 API Development Knowledge ( 2.5 year)

Knowledge, in artisan commands, Relationships , Schedule,Routing Seeding, Middlewares, Notifications, Messaging, Migrations and Ajax.

# Projects

Smart Gate ( Society Management App)

## Role

Combining the roles of a project manager and a proficient Flutter and Laravel developer,

I orchestrated the successful development of a society management solution.

As a project manager and developer, I streamlined processes from ideation to deployment, collaborating with UI designers and DevOps.

This dual role allowed me to deliver a seamless, user-friendly experience while effectively managing the project's lifecycle.

## Multiple Apps for Society Management System

### Super Admin App

Orchestrated the creation of the Super Admin App, streamlining society setup, Sub Admin assignments, and activity monitoring.

### Society Admin App

Developed seamless Flutter applications for Sub Admins and Residents, facilitating communication, event planning, payments, and marketplace engagement

### Gatekeeper App

Engineered a Gatekeeper App for efficient visitor validation, panic support, and secure event coordination

### Sub Admin Finance Manager App

Designed a Sub Admin Finance Manager App to proficiently manage billing, payments, and financial tracking within societies and buildings

## Super Admin Finance Manager App

Oversaw financial operations across societies and buildings through the SuperAdmin Finance Manager App, ensuring transparency

## Applications

- Erp System Application
- Shambapro(play store)
- Go Maidz (play store)
- Bedtime stories with SQLite.
- Quranic cure with SQLite
- Todo app with SQFLit
- Vlc player with flutter
- Doctor app
- Crew app
- Food app.
- Some UI challenges.
- Figma to flutter at least 5 projects done
- Stripe payment jazz cash payment
- Whatsapp Clone
