About Me

- I am a Computer Software Engineering graduate from Al-Hussein Bin Talal University, equipped with a robust foundation in programming, algorithms, and data structures. Committed to excellence, I hold certifications in Flutter and Android development from Udemy and the 1 Million Arab Coders initiative, showcasing my dedication to staying at the forefront of mobile application technologies. Proficient in Android, Flutter, and object-oriented programming, I bring a versatile skill set to the table. My proactive approach to learning and adaptability positions me as a forward-thinking professional ready to tackle challenges and contribute innovative solutions. Eager to apply my expertise in a dynamic and impactful setting, I am driven by a genuine passion for technology and a commitment to driving continuous advancements in the field.

Experience

- **Eskadenia Software**   December 2022 - Until Now
  Mobile Developer
  - Successfully rebuilt and structured Flutter applications to improve performance and introduce new features.
  - Utilized optimization techniques and performed thorough testing to validate improvements.
  - Collaborated with stakeholders to gather requirements and implemented new features according to project timelines.

- **Teaching children programming**   2023 - Until Now
  - Instructed children in programming, devising comprehensive lesson plans. Enhanced with tools like HelloCode and utilized resources like W3Schools for continuous improvement.

- **Solutions Now**   November 2021 - December 2022
  Mobile Developer
  - Maintained expansive knowledge on widely accepted design principles for developing applications within Flutter environments.
  - Cultivated app template libraries to streamline application production during commissioned engineering projects.
  - Documented design patterns for later use as templates in subsequent patches and iterative app development cycles.
  - Planned and engineered RESTful web services to manipulate dynamic datasets.
  - Employed coding practices based on commonly accepted standards to establish site layout and user interface.
  - Designed and developed analytical data structures

- **Future Advanced for internet solutions**   July 2021 - November 2021
  Mobile Developer (android and flutter)
  - By learning a set of topics in the report, they were applied to two applications, the first, M-Commerce, and the second, Fitness App and Quran app.
  - On the other hand, I saw with my own eyes how programmers communicate between Backend and Frontend.
  - Resolved problems, improved operations and provided exceptional service.
  - Identified issues, analyzed information and provided solutions to problems.
  - Increased customer satisfaction by resolving issues.
  - Developed and maintained courteous and effective working relationships.

Education

- **Al-Hussain Bin Talal University**   2018-2021
  Software engineer
  Very Good

Skills

- Firebase
- Planning and Coordination
- Git (GitHub, Bitbucket)
- AWS Media(Cloudfront, IVS, MediaLive)
- Design Pattern (MVC, MVVM)
- Teamwork and Collaboration
- Sql Server and mySql
- RestAPI
- Problem-Solving and analysis
- Maintenance and Repair

Projects

- **Raqibjo (Android)**

  Raqibjo is a solution that revolves around parental control, tracking and Map
  allocation of children's desired devices in real-time. It eases and automates the
  sueillance and safeguard procedure alongside with many related features such as SOS button and contact
  features without inhibiting the children's freedom and mobility.
- **Iktifaa App (Flutter)**

  Social media app for the Saudi Arabia government which contains Reels, Feeds, Stories, Search, Live Stream.
- **Education App**

  We've released multiple versions of our education app, offering a range of features including online exams,
  courses, and a chat function to enhance the learning experience.
- **Nursing App**

  I've recently published a new application designed to assist nurses in managing their workflow and tracking patient
  information throughout the nursing cycle.
- **Patient App**

  I've recently launched a new application aimed at helping patients manage their healthcare journey by efficiently
  tracking and organizing relevant information throughout their care cycle.
- **Allemne Apps (Flutter)**

  Two main apps one for the students and the other one is for the teachers.
  Both of them are used to schedule courses between them.
- **M-Commerce (Flutter and android)**

  An application that displays a group of goods in the form of a list with the price, and as soon as you click on it,
  you will be taken to a page with more explanations about the product, the existing colors and the price. There is
  also a page where the selected goods and the total price are located. There is also a registration page through
  email and Facebook. There is a personal page and the ability to modify it.
- **Loyalty App (Flutter)**

  An application that aims to increase the demand for restaurants through vouchers and offers for restaurant
  customers
- **Fitness (Flutter)**

  An application in which there is a set of exercises that are divided into four sections, the rst for the hand, the
  second for the foot, the third for the rumen and the fou h for the shoulder. Each section has a group of animation
  that simulates a group of specialized movements in the same section.
- **Indonesian Food (Android)**

  An application that displays a set of dishes in a ve ical and horizontal recycleiew with prices with the possibility
  of adding them to the basket. It also contains the possibility of payment through the application, and there is the
  ability to see the details and ingredients of the dishes.
- **Quran app (flutter and android)**

  An application that contains a list of some Quranic verses, when you click on one of them, the voice of the reader
  will be output.
