Objective

Dedicated Laravel Developer with a passion for crafting efficient and scalable web applications. Seeking to leverage my expertise in Laravel framework to contribute to innovative projects, collaborate with cross-functional teams, and drive impactful results. Committed to staying updated with emerging technologies and continuously enhancing my skills to deliver high-quality solutions that meet client objectives.

Experience

- **Kataria Software Solutions, Gurgaon**   Oct 2023 - Till
  Laravel Developer
  Worked on the Transport Management System (TMS), focusing on developing Tracking, Project, Sales, and Admin modules.

  Tracking: Integrated a third-party tracking API to monitor vehicle locations, ensuring real-time updates. Implemented cron jobs to automate the process of updating vehicle locations.

  Project: Developed a dynamic project module, allowing users to create their own projects without the need for coding knowledge. This feature enhances user flexibility and customization options.

  Sales: Streamlined the sales process by enabling users to upload Excel data directly into the database. Generated leads from social media platforms and maintained a record of leads, updating their status as necessary.

  Admin: Managed the administrative aspects of the system, including user permissions for accessing different modules. Automated email notifications to users upon account creation. Facilitated the creation of new users and assigned modules to specific companies as needed.

- **Digital fox, Mohali**   Dec 2021 - Sept 2023
  Laravel Developer

Education

- **MDU, ROHTAK**   2016
  MCA

- **MDU, ROHTAK**   2013
  BCA

Skills

- HTML
- CSS
- JAVASCRIPT
- BOOTSTRAP
- JQUERY
- PHP
- MYSQL
- VUEJS
- AJAX
- LARAVEL FRAMEWORK

Projects

- **MyIHR**
  US based project that is used to manage data
  Link: https://www.myihr.com/
- **Petspace**
   Contributed to the development of Petspace, a prominent Dubai-based eCommerce platform specializing in the sale of dogs and cats. Leveraged Laravel framework to build robust backend functionalities and integrate seamless user experiences. Collaborated closely with a multidisciplinary team to implement features such as user authentication, product listings, payment gateways, and administrative dashboards.

- **Doctalkgo**
  Contributed to the development of Doctalkgo, a leading US-based telemedicine platform enabling patients to schedule virtual appointments with doctors. Collaborated with a skilled team to implement robust features, including patient-doctor appointment scheduling, secure communication channels, and prescription management. Integrated functionalities for doctors to review patient appointments, assess reasons for visits, and provide accurate prescriptions. Implemented seamless integration with area pharmacies, ensuring efficient processing and fulfillment of prescriptions. Maintained high standards of security and compliance with healthcare regulations to safeguard patient data and privacy. Played a key role in delivering a user-friendly and reliable platform that enhances access to healthcare services for patients while streamlining workflows for medical professionals. Links to specific services include:

  Addyi Staging
  Feel Confident Staging
  Primus Renewal

Version Control

- Git, vscode

Payment Gateways

- Razor pay, authorized.net, square payment gateway, Braintree payment gateway

Server

- **Centos 7**
  Project setup, Code deployment with git
