Objective

I am an experienced software developer and seeking great opportunity to work with a fast-growing company. I bring around 3+ years of experience with .Net core and angular and more than 3 years experience in the technology industry. And am willing to provide company some benefits with my problem solving techniques which can help company and myself both grow together in a fast manner.

Experience

- **Civica UK MNC**   Mar/2024 - Present
  Software developer

  Worked as a Full stack developer where i have worked on .net core and web api for providing services and http requests using middleware and applying dependency injection like singleton, scoped and transient in it as a lifetime of .net.
  Worked on frontend part in angular where created components such as js,html and css in it and using syncfusion for UI/UX. And applying routing and using CI/CD in azure for integration.

  Developed and implemented various projects on angular and dotnet core by its knowledge and understanding.

  Developed and helped in Election management for new development and enhancement using .net core, Angular and done unit testing using karma , zest and jasmine .

  Developed a modular, single page web application which incorporated responsive design properties.

  Created an API gateway that improved system performance and reduced latency.

  Created Stored procedures for performance issues in database.

  Skills Used : Asp.Net, .Net core version 5 and 6 both, Angular version 2+ , Unit Testing, Web api, MVC, c#, Sql Server

- **Welspun World**   Sep/2023 - Mar/2024
  Software developer

  Utilized OOPs principles to improve code readability and maintainability.
  Collaborated with cross functional teams to identify customer requirements and develop Technical solutions.

  Implemented a responsive design that ensured web application was accessible on all devices.

  Implemented a project for data of a gatepass entry whether the assets are entered is returnable or non returnable and for whether the asset is received or not.

  Worked on welpro project where I have worked in pmgm module and ticket raising module for new portal.

  Skills Used : Asp.Net, .Net core version 5, Angular version 2+ , Unit Testing, Web api, MVC, c#, Sql Server

- **Dynatech Systems**   08/2022 - 07/2023
  Software developer

  Implemented a microservices that improved system modularity and reduced dependency between components.

  Developed a RESTFul API that handled many requests per day with response time under less period of time.

Developed a secure Authentication system that met industry standards for data protection and privacy.

Designed and implemented a RestFul web API for integration with third party services.

Developed a secure API driven web application with a modern and responsive user interface.

Here also I have worked on .net core and web api for providing services and http requests using middleware and applying dependency injection like singleton, scoped and transient in it as a lifetime of .net.

Skills Used : Asp.Net, .Net core version 5 and 6 both, Angular version 2+ , Unit Testing, Web api, MVC, c#, Sql Server

- **Allscripts healthcare pvt ltd (Mindpool Technologies)**   June/2021 - June/2022
  Associate Software trainee

  Worked as a software associate trainee where I have worked on .net core and web api for providing services and http requests using middleware and applying dependency injection like singleton, scoped and transient in it as a lifetime of .net.

  Worked on frontend part in angular where created components such as js,html and css in it. And applying routing and using CI/CD in azure for integration.

  Developed and implemented various projects on angular and dotnet core by its knowledge and understanding.

  Developed and helped in SOP for new portal enhancement using .net core, Angular and done unit testing using karma , zest and jasmine .

  Developed a modular, single page web application which incorporated responsive design properties.

  Created an API gateway that improved system performance and reduced latency.

  Skills Used : Asp.Net, .Net core version 5 and 6 both, Angular version 2+ , Unit Testing, Web api, MVC, c#, Sql Server

Education

- **Parul University**   2021
  BTech in Information Technology
  7.9

- **Prime science school**   2017
  12th Higher secondary
  52 %

- **Shree satya Sai vidhyalaya**   2015
  10th Secondary
  68%

Skills

- Javascript
- HTML & CSS
- Dot Net Core
- Web Api
- Angular
- Dot net mvc
- Unit Testing
- CI/CD pipelines
- Web api unit testing
- Product Management gathering requirements meeting perfect timelines.
- Communication

Projects

- **Gate Pass project (Skills used : .net core , Angular 2+, sql server)**

  This is a company project where I have worked alone and used .net core web api sql where stored procedure and functions played a big role where I have been part of saving around 4 to 5 lakhs of company years as this was a third party project ans they were using vm as well so thus was a good project personally to learn many things.

- **Toastmaster's international (Skills used : .net core , Webapi)**

  In this project I have worked majorly on web api part where I have made use of get put post method and dependency injection was used here by using transient and singleton.

  Here I have also written unit testing code for web api testing.

- **CSC Steel Project (Skills used : .net core , webapi, UnitTesting)**

  In this project I have worked on multiple areas like retrieval of data from database then by routing with frontend part and passing different http requests from services.

  And also worked on frontend part where javascript html and css played a major role.

  Here I have also created an api gateway through which the data can be retrieved.

- **Saica (South Africa institute of chartered accountant)(Skills used : .net core , Angular 2+)**

  In this project I worked on various parts of frontend development like javascript, html and css using angular with backend portion where I have used web api in .net core.

- **TTC (Teaching Company)(Skills used : .net core , webapi)**

  Here I have worked on javascript part and retrieving data from database using postman for api data in json.

- **SOP Portal and EPCS(Skills used : .net core , Angular 2+, webapi,Unit Testing)**

  Worked in UI Portal page in Shield operational portal.

  Developed and implemented the new code which adaptability is more and reused the code for the portal.

  Worked in EPCS portal, where all the medical prescriptions were being handled, which prescription needs to get the permissions or which prescription can be allowed without permissions,etc.

Activities

- Served as a Tcs campus ambassador from Parul University
- Served as a capgemini campus ambassador from Parul university
- Been a part of a placement coordinator at Parul University
