PROJECTS

1. Dishdash Mobile Application — [App link](#)

Dishdash mobile application based on iOS & Android platform which provide dishes & pantries for Team meetings, Daily Lunch, Dinner, Breakfast, Buffet & Other occasion to end user. User can choose the buffet setup or bento selection online. So everyone can get the food they want. Here dishdash work as a mediator between companies and restaurant. And provide a online platform that is easier for users.

2. Dishdash Vendor Mobile Application — [App Link](#)

Dishdash Vendor Mobile Application based on iOS & Android platform which provisions end user like vendor(For the Dishdash) to pick the order and place on a specific location by time. They got notifications time by time for specific orders & their delivery.

3. Doctor Anywhere— [App link](#)

Doctor Anywhere connects you with Singapore-registered doctors for online medical consultations through live video on our mobile app.

Our secure platform supports diagnosis, treatment and referral services so that our doctors can offer an optimal consultation that supports your overall care and treatment plan. Doctors on our platform can issue medical certificates, if necessary, and prescribe medications that can be delivered to your doorstep or collected at a suitable clinic.

4. Eat Back— [App link](#)

Extra Savings: EatBack connects you to the restaurants that are offering best deals and promotions, and gives a portion of what you pay for your meal back to you. This is on top of the existing deals or discounts offered by restaurants.

- Unlimited Options: EatBack returns you CASH. You can redeem the cashback and spend on any other food, clothes, or basically, anything you want. What's more? There is No Limit to the amount of cashback you can earn!

5. Dilooni— [App link](#)

A free dating application that will help the user to connect with others in the Druze community. Dilooni is modern dating for modern Druze. It is community-specific dating app in which user can match with others and start chatting.
