## WORK EXPERIENCE

### React Native Developer AJCL (Private) Limited

09/2023 - Present

Karachi, Pakistan

#### Responsibilities

- Architect and code robust React Native solutions for warehouse management, focusing on user interface design and a seamless user experience.
- Ensure data integrity and security by integrating mobile apps with backend systems while rigorously testing and optimizing app performance.
- Stay updated with the latest mobile development trends and technologies, while documenting codebase and sharing knowledge for effective project maintenance

### React-Native Developer DigiTrends Pvt Ltd

07/2022 - 08/2023

Karachi, Pakistan

#### Responsibilities

- Design and implement user interface components for JavaScript-based mobile applications using React native ecosystem.
- Work with the native modules when required.
- Improve front-end performance by eliminating performance bottlenecks.
- Work with Redux architecture to improve performance of the mobile apps
- A complete understanding of the full mobile app development lifecycle right from prototyping.

### Junior React-Native Developer Q-Technologies

12/2021 - 06/2022

Karachi, Pakistan

#### Responsibilities

- Create front-end modules with maximum code reusability and efficiency
- Work with the third-party dependencies and APIs
- Work on user interface design and responsive designs

## EDUCATION

### BSCS

Virtual University Of Pakistan

02/2022 - Present

## SKILLS

javascript

React-Native

React.js

Redux

Redux-Thunk

Redux-Saga

Firebase

## PROJECTS

### My Food Fetch

- **Project Details:** It has two primary roles, User and Driver. Users can select their pickup and drop-off points, place their food order, and make payment. Once the order is confirmed, the driver will receive the order details and deliver the food parcel to the user's desired location. .
- Push notifications for order confirmation, delivery status updates, and driver information.
- Real-time tracking of the driver for the user to monitor the delivery status

### Drive Hunger Away

- **Project Details:** Drive Hunger Away is a mobile application that I developed from scratch using React Native technology. It is a platform that connects donors, donees, and volunteers to drive hunger away by donating food and clothing items. The application has several key features that make it an effective and efficient solution for those in need.
- Three Roles: The application has three roles - donor, donee, and volunteer - each with unique functionalities to facilitate the donation process.
- Real-Time Tracking: The application uses Firebase for real-time tracking of donations, allowing donors, donees, and volunteers to track their donations' progress.
- Social Authentication: The application offers social authentication, allowing users to log in using their social media accounts.

### Rooting For Recovery

- **Project Details:** The app aims to support individuals who are struggling with drug addiction by providing them with a range of features that can help them maintain their sobriety.
- The app also allows users to track their progress over time by maintaining a streak. If the user fails to upload their progress, their streak will reset to zero.
- It includes a group support finder and OD locator. These features allow users to find local support groups and overdose prevention sites within a 500-meter radius of their current location.
