ABOUT ME

With over three years of experience in software engineering, I am a proficient and innovative professional specializing in designing and implementing robust, scalable, and high-performance Python-based applications. My expertise extends to Artificial Intelligence (AI) and Machine Learning (ML) technologies, where I have demonstrated a deep understanding of models such as OpenAI, Google BERT, Google Gemini, and Haystack retrieval model. I have led Research and Development (R&D) initiatives, including the development of an auto-driving agent for scenario-based simulation using CARLA. Collaborating with cross-functional teams, I translate requirements into technical specifications and develop efficient software solutions, adhering to coding best practices and conducting thorough code reviews. My skills include proficiency in implementing REST APIs, familiarity with frameworks like Django, and knowledge of cloud services such as AWS and containerization. I have a strong customer focus and a proven track record of delivering quality results.
