Skills

Technical Capabilities: Javascript, ES6, HTML5, CSS3, Firebase, Google Maps, Redux, RTK, Hooks, Typescript, CodePush, Push-Notification, Social logins, REST-API, Axios, In-App-Purchase

Frameworks/Libraries: React-Native, React JS

Version Control System : Github, GitLab,

Work Experience

EBizneeds Pvt Ltd

April 2024 - Present

Mobile Application Developer

- Engaged in designing and implementing functionality, REST-API, **In-App-Purchase** in mobile apps, and Managing Apps on store.

Creole Venture Pvt. Ltd

April 2022 - March 2024

Software Engineer

- Engaged in the development of **Android** and **iOS** applications, focusing on designing and implementing user interfaces and functionalities using the **React Native** Framework.
- Experienced in **client communication**, serving as a dedicated developer to meet project goals effectively.

Dessa IT Synergy

Jan 2021 - Feb 2022

Associate Software Engineer

- Proficient in integrating user interfaces and implementing functionalities within mobile applications using the React Native Framework.
- Experienced in utilizing third-party libraries such as **Firebase**, Google Maps, and state management tools like **Redux** to enhance app features and performance.

Projects

AgeVolt | TypeScript, RTK, Saga, Codpush, Social-Login, Axios, Firebase, Localization, Stripe, NFC-Scan

- A Mobile app for electric vehicle (**EV**) drivers that offers various functions such as locating charging stations, energy usage, and reserving a charging spot ahead of time
- Integrated **Amazon Cognito** for seamless **social login** capabilities and enabled biometric login for enhanced security and user convenience.
- Implemented **localization** using **react-i18next** to facilitate language switching.
- Integrated **Stripe** and **PayBull** as payment gateways.
- Utilized **geolocation** to display distances of stations from the user's **live location**, enhancing user experience and functionality.

Preseasoned | JavaScript, RTK, Saga, Codpush, Social-Login, Axios, Fetch, Firebase, getStream

- A Fantasy gaming application that offers various games and updates. Users can participate in Player-Card games, participate in Cricket tournaments, and join the public and private channels to get the latest updates on the match.
- Incorporated chat messaging using the **getStream** SDK for channels and Enabled **deep linking** for channel details and **push notifications** for enhanced user engagement.
- Developed a Cricket tournaments Game Module enabling users to create teams and participate in matches, akin to the Dream11 App.
- Integrated **CashFree** as the **payment gateway** solution.

JobFilez | Typescript, Redux, Thunk, Axios, Firebase

Jobfilez is a complete Field Service and Project Management application that allows contractors and service companies to fully manage their entire team.

- Optimized API call results, which led to **20%** increase in app performance.
- Developed and implemented functionalities for Customer, Expenses, Job, and Pricebook modules, including search, filtering, pull-to-refresh, load-more features, etc., and Enhanced the design of various screens and components using a **styled** library.
- Contributed to the web version of the application using **React.js** library and integrated **MQTT** for real-time tracking of trucks from mobile devices to web applications.

Education

Govt. College of Engineering and Technology

Bachelor of Technology(B.Tech) in Computer Science & Engineering

2014 - 2018

Rajasthan, India
