EPG I 42 Rut lat., Fez

E-commerce Web Site:

As a seasoned Web Developer with comprehensive expertise in both front-end and back-end technologies, I crafted a dynamic e-commerce website that stands out for its user-friendly and efficient online shopping experience. Leveraging a powerful tech stack, including HTML, CSS, JavaScript, Bootstrap for responsive design, PHP, and MySQL for robust server-side operations, and AJAX for interactive user elements, I delivered a complete web solution. This platform showcases my ability to integrate diverse tools and technologies, emphasizing my proficiency in creating sophisticated and engaging web applications.

2021 - 2022

EPG I 42 Rut lat., Fez

School application

A seasoned Mobile Application Developer specializing in both Android and iOS platforms, with proficiency in Java, Kotlin, and Swift for native app development. Expert in leveraging the Flutter toolkit for crafting cross-platform applications, ensuring seamless functionality across devices. Skilled in database management using SQLite and Room, alongside adeptness in applying Material Design principles for intuitive and visually appealing user interfaces. Recently developed a school application from a mobile application perspective, utilizing Flutter for cross-platform compatibility.

2022 - 2023

Freelance I 82 LOTS TGHAT ., Fez

E-commerce Mobile Application

Skilled in e-commerce app development with Flutter & Dart, leveraging Firebase for backend needs, Stripe/PayPal for payments, and GraphQL/REST for server communication. Proficient in state management with Provider/Riverpod, adept at using Flutter DevTools for debugging, and versed in Git for version control. Familiar with coding in VS Code/Android Studio for a seamless development experience.

2023 - Present

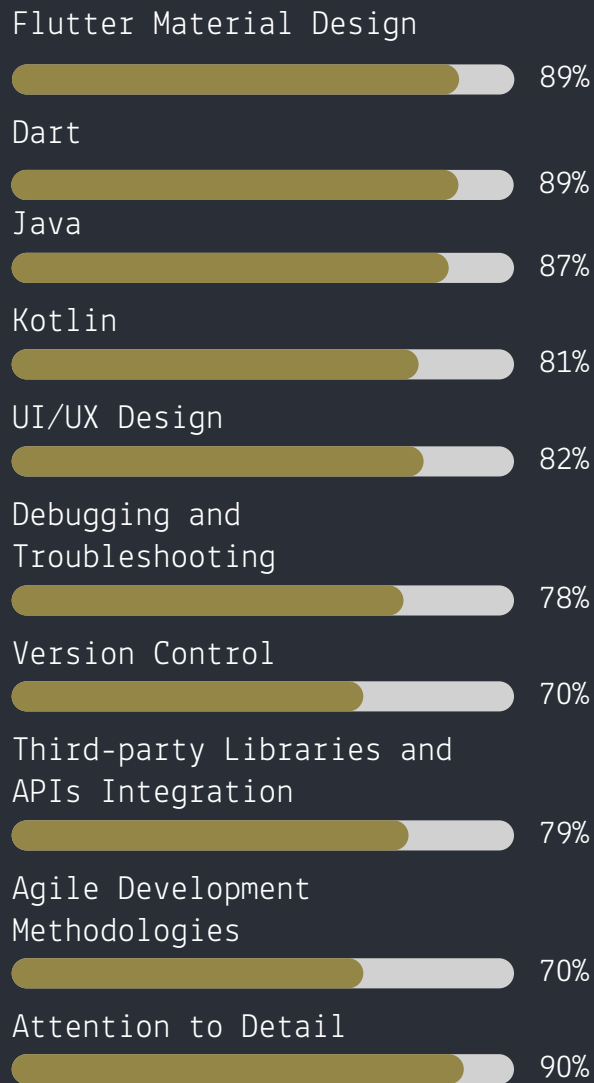

Freelance I 82 LOTS TGHAT ., Fez

Travail Social Media Mobile Application **in Progress**

Developing the Travail Social Media app starts with strategic market research and user-centric design, evolving through Adobe XD prototypes into a dynamic user experience. It's built on Flutter, ensuring a seamless cross-platform performance, with a backend powered by technologies like Firebase for robust, scalable support. The app's journey from concept to market involves meticulous testing, strategic launch planning, and ongoing refinement based on user feedback, all supported by the rich ecosystem of Flutter and online developer resources.
