Eligible to work in: India

Industry: Software Development

Total years of experience: 3

Work Experience

iOS Application Developer

NGFO Technologies - Coimbatore, Tamil Nadu

January 2023 to Present

- Developed user-friendly frameworks for iPhone screens, streamlining navigation and enhancing user experience; reduced bounce rate by 25% and increased user engagement by 40% in first month of implementation.
- Collaborated closely with the QA team to conduct rigorous cross-platform compatibility testing, resulting in a 25% reduction in customer-reported software bugs and improved user experience across all devices.
- Proficiently utilized Swift programming language to develop high-quality, native iOS applications, demonstrating a strong command of iOS development best practices and ensuring optimal user experiences.
- Extensive experience in developing live tracking applications that deliver real-time user experiences, showcasing proficiency in creating dynamic and responsive solutions for seamless monitoring and interaction.

iOS Application Developer

Muviereck Technologies - Chennai, Tamil Nadu

June 2022 to December 2022

- Developed user-friendly frameworks for iPhone screens, streamlining navigation and enhancing user experience; reduced bounce rate by 25% and increased user engagement by 40% in first month of implementation.
- Collaborated with the Quality Assurance team to ensure seamless app compatibility across multiple platforms.
- Worked on applications for the banking sector.

iOS Application Developer

Liainfraservices - Chennai, Tamil Nadu

January 2021 to January 2022

- Designed and developed intuitive user interfaces for iPhone screens to enhance user experience and usability, resulting in a more engaging and user-friendly app interface.
- Collaborated closely with the QA team to optimize app performance, ensuring seamless functionality and a superior user experience, leading to a reduction in app crashes and improved overall performance.
- Seamlessly integrated mobile payment solutions, streamlining financial transactions and enhancing user experiences, resulting in a more efficient and convenient payment process for users.
- Utilized Swift for the development of native iOS applications, showcasing expertise in front-end design and seamless API integration, resulting in fast and responsive app performance.
- Implemented user feedback to enhance app features and functionality, constantly improving the user experience and ensuring the app meets the evolving needs of the target audience.
