English & Hindi

PROJECTS

Shopping App — React Native (Android & iOS)

It's a Shopping App that allows you to add products in your admin section, buy products from another admin, and place orders. Tech used: React Native, React.js, Redux, JavaScript, Firebase & Expo.

Project Review Web App — MERN

It's a web app allowing users to register as mentors or students. Students can add their projects and mentor can add comments and ratings after reviewing them. Tech used: React.js, Node.js, Express & MongoDB.

Publications

GoServices - React Native (Android & iOS)

International Journal of Innovative Research in Technology · Jun 21, 2023

The app offers a user-friendly interface and a streamlined booking process, all thanks to the power of React Native. It is a service booking app that allows users to book repair/replacement services for their devices. This classified platform enables users to list their services for potential customers, who can then book the services listed on the platform. It is a service booking app that allows users to book repair/replacement services for their devices. This classified platform enables users to list their services for potential customers, who can then book the services listed on the platform.
