OBJECTIVE

Experienced Drupal Developer with a strong tracked record in building and maintaining Drupal-based website .Proficient in custom module development , theming and performance optimization .Seeking a challenging Drupal developer position to contribute my skills to dynamic web projects . Detailed individual with ability to develop effective, new, and efficient solutions with zero tolerance for errors and failures.

EXPERIENCE

July 2017 - Nov 2021

- **Software Developer**

Kenoxis Technology Pvt Ltd

Utilized Sublime Text Editor and Visual Studio Code (VSCode) as primary Integrated Development Environments (IDEs) for coding and project management.

Worked with Drupal 9, a powerful content management system, for building the Taxi Web Portal.

Employed MySQL as the relational database management system to store and manage data efficiently.

Served as a PHP developer specializing in Drupal, contributing to the entire web portal development life cycle.

Focused on Restful services development, ensuring robust and scalable communication between different components of the web portal.

Actively participated in module development for Drupal, extending the platform's functionality to meet specific requirements of the Taxi Web Portal.

Integrated Google Authentication API into the web portal, providing users with a secure and convenient way to log in and access services.

Implemented and conducted performance unit testing to ensure the web portal's efficiency and responsiveness, identifying and resolving bottlenecks in code and architecture.
