SUMMARY

Experienced PHP Developer with over six years of expertise in building robust web applications. Skilled in PHP, Laravel, CodeIgniter, MySQL, HTML, CSS, Bootstrap, JavaScript, jQuery, and RestApi. Proficient in AWS EC2, Route 53, Linux, Git, and Jira

EXPERIENCE

Lead Software Engineer

Persistent Systems

05/2023 - Present Noida

- Developed and managed two web applications connected through a remote desktop server.
- Technologies Used: Backend: PHP, MySQL; Authentication: LDAP; Front-end: IBM CSS and JavaScript, HTML and Smarty
- Implemented LDAP for secure user authentication.
- Wrote and managed numerous cron scripts integrated into the Red Hat system for automated tasks.
- Utilized IBM CSS and JavaScript for the front-end design and user interface enhancements.
- Debugged and resolved code errors to maintain application stability.
- Successfully migrated all data from IBM DB2 to MySQL, ensuring data integrity and continuity.

Software Development Engineer

Arya Ag

06/2022 - 05/2023 Noida

- Developed a robust E-Auction and Mandi Price platform using Laravel for backend, ReactJS for frontend
- deployed on Nginx server running on Ubuntu 20. Integrated MySQL database for data storage and REST API for seamless communication between frontend and backend systems.
- Enhanced user authentication and security by implementing OAuth and JWT, securing user data across platforms
- Optimized SQL and NoSQL database queries, reducing load times by 20% and enhancing user experience
- Wrote Cron jobs in laravel for automation for sending weekly, monthly report

PHP Developer

Codenia Technologies LLP

03/2021 - 06/2022 Noida

- Developed hotel web application using Laravel, CSS, HTML, and JavaScript.
- Utilizing WHM and cPanel for application management and hosting.
- Creating APIs for mobile applications
- Implemented functionality to download reports in PDF and Excel formats.
- Integrated Paytm payment gateway for hotel room bookings via the website.
- Working on a laundry clothes cleaning web application

Web Developer

Ostron Electronics

04/2018 - 05/2021 Lucknow

- Developed web application for Bio-Medical Waste Management as per guidelines of CPCB and BMWM rules-2016 for Tracking of proper Collection and disposal of biowaste developed on the CodeIgniter framework
- Web applications generate a unique QR code for every hospital.
- Mobile application Scans barcodes to read the weight of the bio-waste and send it to the server
- GPS devices are integrated into every vehicle for real-time tracking, sending latitude and longitude data to the server to display real-time vehicle location on Google Maps.
