████████████████████	HTML/CSS
██████████████████	React JS
██████████████████	JavaScript
██████████████████	Tailwind CSS
██████████████████	Next JS
██████████████████	Bootstrap
██████████████████	Redux
██████████████████	HeadlessCMS
██████████████████	Gatsby
██████████████████	Formik

EXPERIENCE

03. Associate Software Engineer - Minicore

During my time here, I engaged in diverse tasks such as designing and implementing the user interface using ReactJS, integrating the website with multiple APIs to retrieve and display data, and developing a secure and efficient admin dashboard to manage the website's content.

02. Panacloud Bootcamp 2020

Learnt about Front-End Fundamentals with React, Hooks, Context API, MUI, React Router v6, Typescript, Progressive web apps, Client-side GraphQL, Managing State with Reduxtoolkit, Headless CMS, Stripe, Shopify, Snipcart

01. Internship - Workify

During my three-month internship, I gained proficiency in HTML, CSS, JavaScript, and basic React. and gained hands-on experience in building and deploying web-based applications.

PROJECTS

03. DidSheGaveBirth

"DidSheGaveBirth" is a unique concept that eases pregnancy inquiries from loved ones. The client's website lets expectant mothers update their status for their social circle's convenience. This project enables gift-giving and caters to a diverse range of mothers.

02. Medflow

This website presents the company's offerings, mission, and value proposition, built with Next.js and Tailwind CSS. SendGrid powers the contact form. It provides an overview of plans, services, solutions, team, and operations.

01. JustAddSauce

This website uses Next.js framework, Contentful CMS, and MUI for its UI. Content is dynamic, sourced directly from Contentful CMS. It displays various food items with their respective details.
