- Assisted in implementation of product types to accommodate various scenarios and optimise sales operations.
- Participated in theme creation, module creation, and functionality customization to meet client needs and enhance overall user experience.
- **PROJECTS: Backwood**

---

## PRODUCT SUMMARY

### **MSSQL Ecommerce Migration:**

- Developed a migration module to transfer data from scratch MSSQL databases to Magento e-commerce platform.
- Created store configurations for database service connection, ensuring seamless communication between databases.
- Executed data migration for critical sales operations such as orders, products, customers, and others using message queue processes for efficient and reliable transfer.
- Implemented a robust logging system to track migration processes and ensure effective system management.

### **Diamond Configurator:**

- Developed a diamond configurator module for itinerary management in Magento 2, allowing users to manage items through vendors.
- Implemented features for item enquiry, enabling users to inquire about specific items.
- Developed hold/unhold functionality, allowing users to reserve items for themselves.
- Integrated import/export capabilities for efficient management of diamond items.
- Created various types of user-friendly filters specific to diamonds, enhancing usability.
- Implemented login restrictions on item cost to ensure customer security. Also, Make enquiry feature for hold items through sellers, facilitating communication and transaction management.
