Introduction

I am a seasoned **Solution Architect** with around **10 years** of software engineering experience. Currently, I hold the role of **Technical Manager** in a prominent global Fintech organization. In this capacity, I have successfully managed:

- A **16+** members of technical team.
- Global deployment of payments solutions.
- **Supporting** the team for their technical support.
- **Supporting** the team for their different domain logical and technical requirements and clarifications.
- Managing and communicating with the multiple clients from requirements to end delivery.
- Comprehensive oversight of Google Cloud Platform (GCP), Firebase features, JIRA Management, Managing the server setups, live deployments include APIs, Angular, iOS and Android production releases.
- Taken care of new third-party integrations like payment gateways, bill payments, and more...

Previously, I excelled as a **Technical Lead and Senior Mobile Apps Developer**, leading the implementation of New Mobile Applications for Fintech. My career commenced as a Mobile App Developer, specializing in both iOS and Android Programming, and evolved to encompass roles as a Backend Developer & Research Analyst for the new integrations.

My passion lies in strategically harnessing technology to drive business success and deliver substantial client value.

Highlights

- **Mobile Development:** Designed and developed both iOS and Android applications for multiple platforms like Fintech, E-Commerce, Inventory ...etc.
- **Fintech:** e-Wallets, Cross-border payments, Bill Payments ...etc.
- **E Commerce:** Designed and developed mobile applications for eCommerce platforms, Integrated payment gateways, shipping APIs, and third-party services to enhance eCommerce functionalities.
- **Project Management:** Requirements from clients, Demos, JIRA Management, team management, source controls...etc.
- **Leadership:** Strong leadership and team management skills, with experience in agile methodologies and project management.

Skills

- iOS, Android, WordPress, NodeJS, JavaScript and HTML development
- Fintech, SaaS, IT Compliance
- Integrations (SOAP, REST), Nodejs, Typescript, Mobile Development, Figma, Jira, GCP, MySQL, Microsoft SQL Server
- Leadership, Team Management, Project Management, Technical Support
- Research & Development for the new third party and payment gateways integrations.
