Driven by a passion for quality and efficiency, I leveraged manual and automated testing to enhance product stability at Laerdal Medical, ensuring successful launches. My collaborative skills, honed across roles, significantly improved cross-functional team integration. Expert in Test Automation Frameworks and adept in Scrum, my work has consistently elevated software quality and team performance.

Skills

- Manual and automated testing
- Test Automation Frameworks
- Scrum Framework
- Software Development Tools: JIRA, Confluence

Work History

● **Software Test Engineer**

Laerdal Medical, Bengaluru, India

- Contributed to successful product launches with meticulous pre-release testing efforts.
- Championed a culture of quality within the organization through ongoing collaboration with cross-functional teams.
