Internships

- **Sync interns | Web developer Intern**   Remote | Dec 2022 - Jan 2023
  As a Web Developer at SYNC INTERS, I spearheaded key contributions to diverse team projects, showcasing my expertise in web development and collaborative prowess.

- **CodeClause | Data Analyst Intern**   Remote | July 2023 – august 2023
  Executed two substantial projects, refining my expertise in data-driven decision-making and showcasing proficiency in extracting valuable insights from intricate datasets.

- **Beyond gurukul | Web researcher Intern**   Remote | September 2023 – Nov 2023
  As a Remote Web Research Intern at Beyond Gurukul, I led comprehensive online research, performed data analysis, and developed proficiency in remote work practices, enhancing my overall capabilities.

Skills

- **Programming Languages:**   C/C++ Html . CSS . JavaScript . Python . R . DAX . Data Preparation .Data Analysis . Statistics . Advanced Excel . Data Cleaning . Data Validation . Logical Thinking . Analytical Skills . Verbal and Written Communication . Proactive and Result-Oriented . Adaptability . Problem-Solving
- **Libraries/Frameworks:**   pandas . NumPy . Matplotlib . beautifulsoup . Bootstrap
- **Tools / Platforms:**   Xampp, Jupyter notebook Excel power bi, Tablaue, git, GitHub
- **Databases:**   Sql, mysql mongodb

Projects

- **Music app**
  Designed and deployed a dynamic music app with responsive styling using HTML, CSS, JavaScript, Bootstrap, Tailwind CSS, and hosted on Netlify for an immersive user experience.
- **Weather app**
  Engineered a responsive Weather App with real-time Rapid Weather API integration using HTML, CSS, JavaScript, Bootstrap, Tailwind CSS, deployed effortlessly on Netlify for instant and accurate weather updates.
- **Hotel Data analysis**
  Conducted comprehensive Hotel Data analysis utilizing Python, Jupyter Notebook, Excel, and Power BI, incorporating various Python libraries for insightful visualizations and reporting.
- **Sales Data analysis Dashboard report**
  Created a dynamic Sales Data Analysis Dashboard report by leveraging Excel and Power BI, involving meticulous Data Cleaning, Loading, and implementing Data Analysis Expressions (DAX) for actionable insights.

Certifications

- Python trainings - **internshala.**
- Power bi data analytics **- Udemy.**
- web designing - **Freecodecamp.**
- JavaScript and data structures - **Freecodecamp.**
- SQL - **Hackerrank**
