Nasir Ghaffar

Full Stack Developer
[My Portfolio](#) | [Github Profile](#)

I'm a Full Stack Developer. I have **5+ years** of experience as a Frontend Developer including **3+ years** as Full Stack Developer(Mern/Mean Stack). I love everything that has to do with the latest developments in software development and especially in the Javascript world.

I have extensive experience in designing and architecting frontend technologies, specializing in **Next.js, React.js, and Angular 8+**. I am proficient in Advanced **JavaScript** for both frontend and backend development, utilizing **Node.js** and **Express.js**. Additionally, I have hands-on experience with cloud platforms such as **Firebase**. Collaborating with talented individuals and staying up-to-date on the latest technologies, frameworks, and products are my passions and areas of keen interest.

EXPERIENCE

Freelancing — *Full Stack Developer*

February 2023 - Present

As a versatile and experienced Full Stack Developer, I am currently offering my services as a freelancer, catering to clients' needs across the entire spectrum of web development. With proficiency in both frontend and backend technologies, including React, Angular, Node.js, and more, I possess the skills to deliver robust and dynamic solutions.

House of Techies, Remote — Senior Frontend Developer

March 2022 - February 2023

I worked as a Senior Mern Stack Developer. Responsible for Products Architecture, Planning, Development, Staging, and Releasing, with the collaboration of Junior Developers using Jira.

Technologies being used were Nextjs, React, MongoDB, Express, Okta, ZPL, Socket.io, Docker, Codeceptjs & Jenkins,

Startem Incorporation, Remote — Team Lead & Product Manager

February 2020 - March 2022

I worked as the team lead and product manager to get requirements, create user stories, run sprints, and work as a lead developer for connecting/developing different platform microservices. I also worked on the deployment of the application using AWS, Firebase, Heroku, Netlify, and Github CICD.

Technologies being used were ReactJS, Angular 8+, Advanced JS, Nodejs, MongoDB, and Firebase.

Freelancing — *Designer & Developer*

October 2019 - February 2020

During this period, I leveraged my expertise as a skilled Designer & Developer on the freelance platform Fiverr, where I had the opportunity to showcase my talents and provide valuable services to clients from diverse backgrounds and industries.

PROJECTS

ResQTRX— *Freelance Project*

ResQ TRX is a revolutionary platform for commercial repair and maintenance services in the transportation industry. As a developer, I played a crucial role in building and implementing the platform's functionalities. ResQ TRX provides access to a vast network of repair shops nationwide, ensuring quick and hassle-free maintenance and repairs for trucking businesses.

Digital Platform — *Freelance Contributor*

I had the opportunity to work on Digital Plattform. Digital Platform Tool is an innovative software solution designed to streamline and enhance digital operations for businesses. With its comprehensive features and user-friendly interface, the tool empowers organizations to manage their online presence effectively and efficiently.

Siingio — *with House of Techies Team*

Siing.io is a songs management platform, Where users can manage their songs, choirs, and members. Users can also share their songs with other choir members and get feedback from them.

K&G Tailored Brand — *with House of Techies Team*

Web app has the capability to manage ASNs, LPN, and ITEMS management, with customized print tags and run time barcode tags generation using ZPL printer.

Baseval — *with Startem Team*

Web app has the capability to manage all kinds of payments management functionality like plans/package creations for the products. And get embeddable code and attach it with any product to manage payments and other functionalities in the portal. And the capability to run that portal according to the purchased plan.

Workioz — *with Startem Team*

Workioz is an HR-ready platform that deals with Human Capital Management at the enterprise level. This app has the capability to manage the whole organization and its employees. It can manage Employee's Tasks, Scheduling, Live Tracking, Clock-in, Clockouts, Breaks, Worksheets, Daily Activity, Timesheets, Payroll, Reports, etc.
