EXPERIENCE

GeekyAnts India Pvt Ltd   **Bengaluru, India**
Software Engineer - III   Nov 2021 - Present

- **HDFC :** I contributed to the development of a cutting-edge mobile banking application targeting millions of users, focusing on identifying and resolving issues and bugs to ensure a seamless user experience and optimal performance.

- **Metroghar :** I worked on two Expo React Native apps designed for brokers and property owners, ensuring precise adherence to Figma designs. Developed features such as project and builder listings, favoriting, targeted ads, team management, lead and tie-up listings, report generation, business cards, and site visit tracking.

- **Practice Pro :** I worked on this expo app to enable teachers to create music lessons "blobs" for student practice and implemented social sharing features for students to showcase their progress. Streamlined user experience by integrating Apple and Google sign-in options, and continuously enhanced app functionality through feature development and bug fixing.

- **Jupiter :** I contributed to a popular NeoBanking app (over 1 million downloads) by developing new features, fixing bugs, and crafting user-friendly experiences. Notably, I implemented a card flip animation for displaying account and balance details, which enhanced user interaction.

Konfhub Technologies   **Bengaluru,India**
Full Stack Developer   Sept 2020 - Jul 2021

- **Konfhub:** Leveraging HTML5, CSS3, and frameworks (Bootstrap, Bulma), I built and improved web applications. I automated bulk communication via email, SMS, and WhatsApp using APIs and designed dynamic templates. I also transformed a static website into a dynamic platform with efficient data visualization and optimized API performance through server-side pagination.

PROJECTS

- **Stock Trading App Development:** Built a functional clone of the Groww app using React Native for real-time stock trading.
- **Montra - Expense Tracking App:** Developed a feature-rich expense tracking app with React Native, offering multi-language and multi-currency support.
- **MarketMingle:** Built a comprehensive MERN stack e-commerce platform with robust authentication and user management features.
