Software Engineer

A3logics, Jaipur

E-commerce Competitor Analysis and Sentiment Analysis

- **Objective:** Worked on a project which aimed to facilitate efficient data management for product listings. This involved implementing a robust table-based interface for displaying product data users have the ability to perform CRUD operations (Create, Read, Update, Delete) on the data.
- **Technologies Used:** React, HTML, CSS, JavaScript, Redux, Jest, React Testing Library
- **Key Contributions:**
 - Developed responsive web applications with React, integrating RESTful APIs for real-time data retrieval.
 - Utilized Redux for optimized state management and conducted thorough unit testing to ensure application reliability.

Notification Service and Internationalization

Objective: Streamlined the process of rendering and sending email templates and enhanced the application's localization capabilities.

Technologies Used: JavaScript, Java, GitHub Actions, INTL, flutter_i18n, VS Code, IntelliJ

Key Contributions:

- Spearheaded email template rendering and delivery, integrated INTL for multilingual support.
- Automated CI/CD with GitHub Actions, developed VS Code and IntelliJ extensions for efficient string extraction.

Social Dining Connect App

Objective: This application offers a streamlined method for settling restaurant tabs while fostering connections with people and local places. It enhances decision-making by keeping the user informed about his friends' locations and the crowd at different venues. It allows the user to explore profiles, mutual connections, and nearby places, facilitating introductions through messaging.

- **Technologies Used:** React Native, Redux Toolkit, React
- **Key Contributions:**
 - Developed a native application with React Native.
Translated UX designs from Figma and Adobe XD into user interfaces.
 - Utilized Redux Toolkit for state management and asynchronous operations.
 - Generated invoice PDFs, and implemented payment and chatting systems.
 - Integrated JWT tokens for authentication and authorization.
Optimized app performance with React Native code-splitting.
