Seeking a challenging role as a Sr. Software Engineer, where I can leverage my expertise to lead and contribute to impactful projects. Dedicated to delivering efficient and scalable solutions, I aim to drive innovation, mentor team members, and achieve exceptional results in a dynamic and collaborative environment.

WORK EXPERIENCE

Software Engineer Singsys Pte. Ltd.

12/2021 - Present Lucknow

Achievements/Tasks

- Proficient PHP developer with hands-on experience in building dynamic web applications using Laravel, CodeIgniter (CI), and JavaScript technologies.
- Utilized JavaScript frameworks and libraries to build dynamic and real-time features, such as form validations and asynchronous data fetching.
- Successfully integrated and managed third-party APIs, including QuickBooks and various payment gateways, to streamline financial processes and facilitate seamless transactions within web applications.
- Integrated third-party APIs and external services using PHP and JavaScript, expanding application capabilities and integrating external functionalities.
- Leveraged JavaScript and jQuery to create interactive and responsive front-end features, enhancing user engagement and usability.

Web Developer

DeveloperBrothers Pvt. Ltd.

08/2019 - 11/2021 Kanpur

Achievements/Tasks

- Worked on migration projects, successfully transitioning legacy CodeIgniter applications to modern Laravel-based architectures.
- Developed and maintained RESTful APIs in Laravel and CodeIgniter, facilitating seamless communication between front-end and back-end systems.
- Contributed to open-source projects and actively participated in online developer communities to stay updated with the latest PHP and JavaScript trends.
- Created and optimized SQL queries for database operations, improving application performance and data retrieval efficiency.
