- High School Desari,Vaishali, (BSEB Board) in 2014

PROJECTS

The Gold Class (Hotel Booking)
- **Technology used to develop the project:** In this project, we use an Android application, Expo React Native, Node.js, Express.js for the API, MongoDB for the database, React-Redux, JWT for tokens, Cloudinary to store images, Stripe for the payment gateway, VS Code Editor, and GitHub to store the project.
- **Client Requirements and Project Description:** The Gold Class app was designed and developed to cater to the event booking needs of the hotel. It has two frontends: one for the hotel and one for the user, along with an admin panel and backend. The hotel-side frontend is for onboarding and receiving user booking queries. It also has a separate feature for adding events, allowing the hotel to manage events accordingly. The user-side frontend is for onboarding users and enabling them to book hotels. The event booking feature includes various options, such as choosing multiple hotels and customizing the itinerary, including the number of days, rooms required, food, liquor, and more. The admin panel maintains comprehensive records and data of all users,

hotels, bookings, and cancellations.

- **Role and Team Makeup:** In this project, I am working as a full stack developer. Including me, we have three team members.
- [Google Play Store URL](#)

Plix Life (eCommerce Store)

- **Technology used to develop the project**: website development, e-commerce platform management, HTML/CSS/Material UI, Next.js, GraphQL, SEO optimization, mobile responsiveness, and GitHub.

- **Client Requirements and Project Description**: Develop server-side logic, databases, and applications to support the functionality of e-commerce websites, including shopping carts, payment processing, and inventory management. Implement and maintain security measures, such as SSL certificates, firewalls, and data encryption, to protect customer data and ensure secure transactions. Implement on-page and technical SEO best practices to improve search engine rankings and increase website visibility. Manage and optimize databases for efficient product catalog management, customer data, and order processing.
