RANA MUHAMMAD AHMAD KHAN

SUMMARY

I'm a results-driven front-end developer with a passion for creating user-friendly interfaces. With a strong foundation in web technologies and a focus on responsive design, I transform concepts into visually stunning and accessible web applications. I thrive on staying updated with the latest trends and industry best practices. My goal is to contribute to impactful projects, crafting seamless user experiences and continually expanding my skill set.

EDUCATION

BS in Civil Engineering	2017 - 2021
Comsats University Islamabad	

FSc Pre-Engineering	2014 - 2016
Comprehensive High School	

EXPERIENCE

React Developer	2022 - Present
Dark Cirus	Remote

- Led the development of dynamic web applications using JavaScript and React, prioritizing user interactivity.
- Collaborated with cross-functional teams, taking React projects from concept to completion.
- Enhanced user interfaces using modern React features and third-party components.
- Customized third-party React elements to extend application functionality.
- Translated design mockups into polished, intuitive interfaces with a focus on user satisfaction.
- Optimized performance, ensured SEO-friendliness, and maintained design consistency.

Bubble.io Developer	2021 - 2022
Jeenie Ai	Remote

- Developed and maintained web applications using Bubble.io, emphasizing user-friendly interfaces and functionality.
- Collaborated with cross-functional teams to bring Bubble.io projects from concept to production.
- Leveraged Bubble.io's visual development platform to create interactive web applications.
- Integrated third-party APIs and plugins to extend the features of Bubble.io applications.
- Ensured accessibility and cross-browser compatibility while optimizing performance and maintaining version control.

PROJECTS

Wander Log (React, JavaScript)

Developed an interactive map app with React-Leaflet, React-Date Picker, and React Router, utilizing Context API and custom hooks for efficient state management, real-time data fetching, geolocation, and modular CSS for enhanced user engagement

Pizza Ordering App (React, RTK, JavaScript)

Utilizes Redux Toolkit to fetch and manage pizza order data from an API, offering priority orders with a 20% premium, all without requiring user sign-up

Weather App (React, JavaScript)

Provides real-time weather data using Open Meteo API, fetching location-specific information and weather updates, rendering detailed daily forecasts, and deployed on Netlify

Other Projects

- Quiz App
- MovyMood
- Split and Pay
- Travelling Checklist
- Currency Converter
- Steps Counter App
