Application for the available position

Being a master's student in IT security management studies with a specialisation in the domain of security control and management includes subjects like Risk Management, Project Engineering Management, IS Governance and Trending technology. I have had a wonderful opportunity to thoroughly get insights about the research area of the parallel growth of the technology and to control or safeguard their growing vulnerabilities.

Done my master's thesis in the Intrusion Detection system and Blockchain to prevent Crypto-jacking (scam of digital currency by hackers) in an organisation and Banking.

An IT Technology field where I worked as a Project Engineer gave me the real feel of acquisition with security domain strategies and how properly planned strategies would acquire good results.

- Had worked in the platform for a few months in the AVEKSA tool for re-certifying the employer in the Lloyd's Bank London and TSB Bank London like creating new applications and holding the database regarding their work.

- After moving to AVEKSA worked in OIM (Oracle Identity Management) the user access verification tool was to pull out the data of the employer and keep track of their listouts. Carried out the re-certification process quarterly for a year.

- Completed daily construction tasks while ensuring safe working conditions, staying on budget and meeting project deadlines related to customer aspects.

- 2 years of Experience in the Security domain for the banking sectors and manually solving errors using Manual Testing or Automation Testing of Databases related to the Oracle environment.

- 1 year of Experience working on an IT support team handling customer queries and troubleshooting problems.

- 2 years and 6 months of Experience in E- scooter micro-mobility of handling the Taxify Admin Integration, IoT and Workday-related stuff which is the main thing of connecting the scooters live on the streets and activating them according to the city range in the Admin live. Handled 5 cities as a Team lead and manager for the overall operations I believe I have enough experience and qualifications to work with the company's opportunities.

I hereby thank you for the valuable time spent considering my motivation. I look forward to meeting you during an interview to discuss why would I be a better candidate for this opportunity.
