Summary

With 10+ years of software development experience, I have contributed to projects small and large, demonstrating my professionalism with unmatched quality and reliability.
Being a professional developer means understanding all the requirements of a project and finding the best way to implement it to a high-quality standard.

As a senior fullstack engineer, I am proficient with modern web languages and I always focus on project structures and coding style, and etc.
Also I have great experience with cloud architect and when it comes to AWS and GCP, I'm considering myself one of the most qualified engineers.
