MBA in Marketing and HR

2016 - 2019
RDEC Ghaziabad

Bachelor of Technology
BTech in Computer Science and Engineering

2013 - 2016
Ingraham Polytechnic

3 Years Diploma
3 years diploma in Information Technology

CERTIFICATIONS

Data Science with Python   - Simplilearn(3909074)

Analyzing and Visualizing Data with MS Power BI   - Simplilearn(3949790)

BI Introduction to Data Analytics   - Simplilearn(4005631)

PROJECTS

Data Assignment Automation
I developed a Python script for data assignment automation at Justdial. The script reads data from an Excel file, distributes tasks among team members, and saves separate Excel files for each member. This automation significantly enhanced our data management efficiency and organization.

File Compilation Automation for Data Processing
Developed a Python script to automate the compilation of data from multiple Excel files located in a specified directory. The script reads the first sheet of each Excel file, whether in .xlsx or .xls format, and combines them into a single consolidated Excel file. This streamlined the data processing workflow and significantly reduced manual effort and time required for data consolidation.
