## Summary

I'm a quick learner type of person having experience in Web development in Laravel, WordPress, and database normalization.

I am a dedicated and results-driven developer with a focus on Laravel, PHP, and team leadership. With extensive experience in building applications using Laravel, PHP, websockets, APIs, JavaScript, and jQuery, I am passionate about delivering robust and innovative solutions.

My expertise extends to implementing websockets for real-time communication and creating seamless APIs to enable smooth integration with external services.

As a CI/CD enthusiast, I automate development, testing, and deployment for swift and reliable project delivery, fostering continuous improvement.

I also possess a basic understanding of AWS services like Lambda and EC2, allowing me to explore cloud-based solutions for scalable and cost-effective applications.

I thrive in complex problem-solving, designing efficient database schemas, and specifying project flows. As a team leader, I foster collaboration, empowering each member to excel.

## Experience

### Senior Software Engineer

Karigar Web Solutions

Apr 2023 - Present (5 months)

### Software Engineer

Karigar Web Solutions

Feb 2022 - Apr 2023 (1 year 3 months)

Design and build advanced applications for the Laravel platform Collaborate with cross-functional teams to define, design, and ship new features.

Having a strong grip on Eloquent Model, Relationships, Migrations, MVC structure, and API resources.

Designing DB schema and normalizing the DB structures.

Got experience in integrating third party-apps and different payment gateways. I've good experience in integrating mostly used apps like google sheets, drive, OneDrive Paywithextend, and DropBox.

Payment gateways I've integrated so far are PayPal and Stripe with recurring/subscription payment handling as well.

Skill development: following development standards PSR-12, Writing reusable code, Implementing DRY principle

### Software Engineer

WPBrigade

Nov 2019 - Feb 2022 (2 years 4 months)

Building WordPress sites from scratch using standard approaches like Gutenberg blocks development.  
Integration of third party APIs.  
Providing maintenance work to various type of sites.  
Building REST API in WordPress and speed optimization of endpoints.  
Also providing services for Laravel project.  
Having a good experience of database normalization, building optimize queries and joins as well.

## Education

### University of Gujrat

BS, Information Technology

Oct 2015 - Oct 2019

## Licenses & Certifications

### Microsoft Office Specialist Master Certification (MOS) - Netcom Group

## Skills

Solution Architecture • Databases • WebSocket • PHP • Laravel • JavaScript • jQuery • Object-Oriented Programming (OOP) • Problem Solving • Representational State Transfer (REST)
