SUHANA PARVEEN

MOBILE APPLICATION DEVELOPER

New ashok nagar, Agra | ☎ +91-8445551092 | ✉ psuhana0499@gmail.com

PROFILE SUMMARY

I'm a dynamic software engineer with approx **3 years** of React-Native and Flutter experience, specializing in creating interactive UI/UX for Android apps. Proficient in SDK integration and API, I also have a successful track record of deploying apps to both the Google Play Store and Apple App Store. I'm eager to bring my expertise to a competitive, growth-oriented team

PROFESSIONAL SKILL

- Communication
- Problem solving
- Client -Dealing
- Team work & Time management

TECHNICAL SKILL

- React-Native
- Flutter
- Javascript
- MySQL
- Dart
- Java
- Web Languages
- Data Structure

WORK EXPERIENCE

Software Engineer   **May 2023 - Present**

Antino Labs, Gurgaon

- Responsible for implenting the GraphQL API calling and data rendering on the UI
- Deep linking and push notification for proper functioning of application.
- Fixing the end points of different modules.
- Worked on SDK integration like Amoga , Moengage etc.
- Used Hook form dependency for better functionality.
- Involved in daily standups, extreme programming techniques, and Agile mastery.
- Deployment of application to the Google Play Store and Apple Store.

Mobile Application Developer   **Sept 2021 – May 2023**

Affle india , Gurgaon

- Responsible for building out the static UI, adding the dynamic attributes to large automotive applications
- worked on hooks and moved some class-based components to functional
- Expertise in using bug tracking tools like JIRA
- Good command of OOPS concepts, Arrays, Strings .
- Created custom Push Notifications and interactions using third party dependecy
- Developed login front end functionality - including RESTful service calls, credential storage, routing, token verification, and error notifications
- Involved in daily standups, extreme programming techniques, and Agile mastery.
- Deployed application to the Google Play Store and Apple Store
- Used Crashlytics to detect and fix bugs.
- Extensively used Web Views to display web components and parent.
- Utilized social networking and analytics APIs such as Facebook, Google Analytics using Firebase.
- Capable of developing, software designing, and maintaining software applications

PROJECTS

1. **JOBIZO (React-Native)**
2. **Flippy Finance (React-Native)**
3. **Home super food (React-Native)**

4. **Savoir (React-Native)**
5. **CIG (React-Native)**
6. **Pawkit (Flutter)**

EDUCATION

Master of Computer Application(MCA)

Abdul Kalam Technical University ,Lucknow

July 2020 - June 2022

Bachelor of Science(B.Sc-IT)

Abdul Kalam Technical University ,Lucknow

August 2017 – Nov 2020

PROJECT'S SUMMARY

1. JOBIZO

Role – React Native Developer

Technologies used – React Native, Javascript , GraphQL API , Firebase, SDK Integration

Description – I independently spearheaded the development of a healthcare job-finding application, covering end-to-end responsibilities. This included UI design, logical implementation, SDK integration for Moengage and Amoga, architectural enhancements, and seamless Firebase and GraphQL API integration. Additionally, I leveraged Native base for app development.

I successfully launched the application on both the App Store and Google Play Store, managing the deployment process. I also handled test builds using TestFlight. My role required direct client engagement, which has enriched my client interaction skills. I spent ten months working directly at the client's location, gaining valuable experience in client collaboration and contributed to project management through JIRA and Xcode.

2. HSF(Home Super Food)

Role – React Native Developer

Technologies used – React Native, Javascript , REST API , Firebase, SDK Integration

Description – It was an application to buy and sell food , you can become seller or buyer depending upon your need. I have worked as a react native developer on frontend with team of 2 people and have handled UI and implementation tasks and bug fixes.

3. Pawkit

Role – Flutter Developer

Technologies used – Flutter, Dart, Firebase, Rest API

Description – It was an application which helps you to list your pet for adoption or adopt a pet. I have worked as a flutter developer on frontend with team of 2 people and have handled UI designing ,implementation tasks and bug fixes.

4 . Flippy Finance

Role – React Native Developer
Technologies used – React Native, Javascript ,Rest API ,Firebase
Description – It was a cryptocurrency application which helps you to look up for various cryptocurrencies and to learn about them and to invest in them. I have worked as a react native developer on frontend with team of 2 people and have handled UI implementation and bug fixes.

5 . Saviour

Role – React Native Developer
Technologies used – React Native, Javascript ,Rest API ,Firebase
Description – It was a Nigeria tourism based application where you can look up for popular places nd restaurants and book them. I have worked as a react native developer on frontend with team of 2 people and have handled UI and implementation tasks, bug fixes and worked with razor pay payment gateway.

6 . CIG

Role – React Native Developer
Technologies used – React Native, Javascript ,Rest API ,Firebase
Description – It was a Dubai based application where you can look up for renting lands and offices.I have worked as a react native developer on frontend with team of 2 people and have handled UI designings ,implementation tasks and bug fixes.
