PROFESSIONAL SUMMARY

A Result Driven and highly motivated software developer who aims to work collaboratively with a firm which offers growth to every individual which helps in shaping the future. I believe in offering a proven track record .

WORK EXPERIENCE (Sep 2021 to Present)

Programmer Analyst (1 year)

Completed intensive training covering front-end and back-end development. Gained proficiency in modern web technologies and frameworks.Developed smaller project like audit management using angular, Java , mongodb, AWS etc Transitioned to working on real-world projects. Contributed to various stages of the software development lifecycle.Debugged the code & solved the bug , wrote unit test for angular as well as node.

Associate Developer (2 years)

Developed dynamic and responsive user interfaces using HTML, CSS, Angular, and React. Utilized Storybook for developing and testing UI components in React. Implemented and managed databases using MongoDB. Played a key role in building projects from scratch. Wrote and maintained unit tests using Jest to ensure code quality and reliability.

PROJECTS

Worked for US Based client, 30 Months

- Developed a user-friendly and responsive website using full-stack technologies like HTML, CSS, JavaScript, React, Angular.
- Collaborated with cross-functional teams, including designers and backend developers, to ensure seamless integration of features and optimal user experience.
- Implemented modern design principles and best practices to create an engaging and visually appealing interface for users.
- Conducted thorough testing and debugging to identify and rectify issues, enhancing the overall functionality and reliability of the website.
- Regularly communicated project progress and updates to stakeholders, fostering a transparent and efficient development process.
