EXPERIENCE

15/11/2021 - 22/03/2022

INDEV CONSULTANCY PVT LTD
Junior flutter developer

Design and develop high-volume, low-latency applications for mission-critical systems,
delivering high-availability and performance
Contribute in all phases of the development lifecycle: concept, design, build, deploy,
test, release to app stores and support.
Diagnose performance issues, fix bugs (including crashes and ANRs) to increase the
functionality of the application
Write well designed, testable, efficient code
Ensure designs are in compliance with specifications
Prepare and produce releases of software components
Support continuous improvement by investigating alternatives and technologies and
presenting these for architectural review
Collaborate with team members (product managers, developers, designers) to
brainstorm about new features and functionalities.

March 2024

Maitbiz POS software
developer/marketing/technical support

I was join as a hybrid developer after finishing development.I work as a field marketing guys because that's time company requirements for marketing so and i do my best for company

PROJECTS

WallpaperCraft
This app is a great tool for free wallpapers.i published in Google Play Store. The app only displays according to the size of the screen background and wallpaper. All cool wallpapers are designed to fit all mobile devices. Users can experience selected best backgrounds and creative wallpapers to make your screen unique and elegant.
The application displays only adapted to the size of your screen backgrounds and Wallpapers. This allows you to conserve battery power and Internet traffic, and use the app at maximum speed without losing image quality.Frequent updates make the
HD wallpapers and full HD backgrounds you have seen keep the screen shocking.

COLLEGE MANAGEMENT SYSTEM
The project "COLLEGE MANAGEMENT" is made to use that management working in dird. This Project is helpful to Registration of New records into the "COLLEGE". This Project Contain mainly following section:-

1. VIEW SECTION.

2. ALTER SECTION

3. STAFF INFORMATION.

4. STUDENT INFORMATION.

5. TIME-TABLE INFORMATION.

6. STAFF RECORDS(ADD/MODIFY/DELETE)

7. STUDENT RECORDS(ADD/MODIFY/DELETE)

8. ATTENDENCE RECORDS(ADD/MODIFY/DELETE).

The upper "EIGHT" Forms are mainly used in this project. View Section is used to view the information of staff and student and Alter Section is used to modify the records. In staff information we undertakes the general and salary of staff member. In student information we are able to see his/her records about their performance, fee and attendance. In "TIME TABLE" Section we can see the lecture of all Lecturer. IF a new lecturer is appointed to college we can add its general information by using alter section. IF a new Student is admitted to college we can add its general information by using alter section. By using the attendance section we can see the monthly attendance of the student and also prepare monthly attendance percentage.

The Software VISUAL BASIC 6.0 is used as front end for the designing and programming and to create user friendly GUI forms. Oracle is used as backend to create the data tables required to store the information. At present there is no such system which helps in addition, ensure, alteration and demonstration of information to the client. So this system facilitates us to perform all these
