Flutter Developer with a strong software engineering background, adeptly proficient in Dart, Java, Python, and HTML/CSS. Skilled in code reviews, GitHub collaboration, and Push Notifications. Excels in conducting comprehensive levels of testing, encompassing Unit Testing, Functional Testing, and RESTful api integration. Demonstrated leadership in Scrum development for elevated user experiences, particularly in QA-focused mobile applications for both iOS and Android platforms.

EXPERIENCE

01/2023 – 05/2023

DJANGO DEVELOPER INTERN, VIVATECH SOLUTIONS (PVT) LTD

- Successfully completed 2 to 3 projects using the Django framework, leading to improved system performance and enhanced user satisfaction.
- Led Scrum development practices, resulting in a 20% to 25% increase in on-time milestone achievement.
- Enhanced team collaboration during project backend execution.

06/2021 – 01/2022

FLUTTER DEVELOPER, XTREME SOFTWARE HOUSE (PVT) LTD

- Developed and maintained mobile applications using flutter framework. Integrated APIs handled HTTP requests and back-end services using Dart programming language.
- Worked collaboratively within a cross-functional team, contributing to agile engineering principles and practices.
- Applied mobile design patterns and responsive design principles for user- friendly app interfaces.
- Utilized state management techniques like Bloc pattern for efficient app performance.
- Translating user requirements into object-oriented code with a focus on scalability for building flexible and responsive software solutions.

01/2021 – 03/2021

FLUTTER DEVELOPER INTERN, EZILINE SOFTWARE HOUSE (PVT) LTD

- Deployed over 2 projects on Google Play Store, managing code reviews, debugging, and maintenance.
- Developed multiple mobile applications, one currently available on Google Play Store.
- Participated in code reviews and followed software engineering practices for code quality and maintainability.
- Assisted in designing and implementing user interfaces with widget-based ui/ux design.
