- Data Analysis
- Data Visualization
- Data Processing
- Requirement Gathering

EXPERIENCE

CONDUENT

NOVEMBER 2021 – PRESENT

BUSINESS ANALYST

Business Analyst for critical client Verizon and responsible for the following:

- Implementing system updates, core programming, and data identification using SQL
- Analyze data through Python libraries and develop data pipelines for extraction, transformation, and loading (ETL) processes.
- Creating data visualizations using Python and Excel to identify trends and patterns.
- Delivering analytics projects using SQL, facilitating efficient reporting of KPIs and KRIs to senior stakeholders.
- Conducting and managing weekly and bi-weekly agile sprints with teams of over 10 members.
- Gathering requirements and updating specifications.
- Driving process improvement and process re-engineering initiatives.
- Conducting root cause analyses to develop countermeasures for business missteps and enhance operations.
- Tracking and reporting defects using JIRA.

PROJECTS

Workday

- Executed a data migration project, transferring client data from PeopleSoft to the Workday platform.
- Conducted comprehensive end-to-end data mining on test data and assessed test scenarios.
- Performed regression testing at all stages of the data migration process.
- Generated data-driven insights, produced reports, and resolved data migration issues and defects.

Customer Credit Card Analysis

- Developed an interactive dashboard for the identification of individuals failing to meet monthly payment obligations and for consistent timely payers from a SQL database.
- Dispatched reminders to delinquent account holders while assessing individuals with a history of punctual payments for potential credit limit increases.
- Provided real-time insights into critical performance metrics to empower stakeholders in effectively monitoring and analyzing credit card operations.

EDUCATION

Bachelors Of Technology in Computer Science and Engineering

2017-2021

HMR Institute of Technology and Management, GGSIPU
Total : 82.90

AWARDS

- Awarded Excellent Rating several times for Exceptional work in the quarters
- Received appreciation from team and stakeholders for exceptional work
