PERSONAL SUMMARY

A confident and reliable Software Engineer, adept at translating complex ideas into functional and efficient code. With a solid foundation in various programming languages and a knack for problem-solving, I thrive in the dynamic realm of software development. Experienced in the full development lifecycle, from conceptualization to deployment, I bring a blend of creativity and technical expertise to craft robust and scalable solutions. Result-driven IT associate project manager leading cross-functional team to deliver complex technical projects within time and budget dedicated to delivering a high-quality result that exceeds stakeholder expectations.
