PROFILE SUMMARY

Aspiring blockchain developer with a Master of Science in Computer Science and a solid foundation in web development, gained through a successful internship. Experienced in creating robust and scalable web applications, I am now passionate about transitioning into the blockchain industry. With a detail-oriented approach, creative problem-solving skills, and a commitment to delivering exceptional quality, I am eager to apply my knowledge and hands-on experience to cutting-edge blockchain projects. Ready to join a forward-thinking team to drive technological advancements and create impactful digital solutions.

EDUCATION

Master of Computer Science, University of Middlesex

Expected Jan, 2025

Bachelor of Information Technology, University of Gujrat

2018 - 2022

SKILLS

React Js **Node Js**
JavaScript **Solidity**

EXPERIENCE

MERN Stack Developer

Mar 2023 - May 2023

Ineffable Devs

- **Developed Full-Stack Web Applications:** Designed and built full-stack web applications using MongoDB, Express.js, React, and Node.js (MERN) to create dynamic and responsive user experiences.
- **API Integration:** Created and integrated RESTful APIs to enable seamless communication between the front-end and back-end, ensuring efficient data retrieval and manipulation.
- **Database Management:** Utilized MongoDB for database management, including designing schemas, performing CRUD operations, and optimizing queries for improved performance.
- **Collaborated with Team:** Worked closely with other developers, designers, and project managers in an Agile environment, participating in code reviews, daily stand-ups, and sprint planning to ensure successful project delivery

PROJECTS

E-Library: Built a dynamic E-Library utilizing the Goodreads API, allowing users to search for books, view details, and manage other details.

Cryptocurrency Dashboard Implemented responsive design to ensure optimal viewing on different devices. Collaborated with the back-end team to integrate the front-end with the API.

Project Management Tool Expertise in building RESTful APIs using Express.js for efficient communication between the front-end and back-end components and implemented authentication such as JWT (JSON Web Tokens). Integrated WebSocket functionality with the front-end React.js components, ensuring smooth integration and a user-friendly chat interface.
