PROJECTS

1. "Quiz Ranker"

Quiz Project

2023-2024

Technologies used: Html, Css, Bootstrap, JavaScript, Php, Mysql.

It is based on the concept of quiz system to analyse rank . It handles the request of clients, where client register themselves to start quiz in respective subjects and get rank according to their marks.

Few features is under development.

2. "EnDe-Crypt"

Encryption Decryption

2023

Technologies used:ReactJs

It is a basic project.

It is based on the concept of security feature : encryption and decryption . It use encryption standard to encrypt message with user's key and also decrypt it with same key.

3. "UPKRITI-EK-SOCH"

Loan Management Project

2022-2023

Technologies used: Html, Css, Bootstrap, JavaScript, Php, Mysql.

It is based on the concept of loan management project . It handles the request between clients. In this there are two category of client one is lender and other is borrower, where borrower can request for the loan to lenders.

It offers a low interest rate to borrower to repay the lender's amount.

The different concept of the project is that borrower can adjust its emi according to their limits.

Lenders will get installments as their income.
