PROJECTS

pegasus : A cloud based inventory management system and pos

- PEGASUS is a cloud-based Inventory management and POS system which involves a smartphone, a smartwatch, and a Bluetooth barcode scanner. PEGASUS is intended to eliminate traditional high-budget POS systems that can only be afforded by large-income businesses and take up large space. PEGASUS could generate various kinds of sales reports and could help to draw meaningful insights that could potentially help in the progress of the business.
