## Professional Profile

- I have about **9** years of experience in web application development. I worked on many professional projects and got a good grip over the **Backend** as well as on the **Frontend** technologies.
- My main expertise in Backend development lies in **Core PHP, Laravel, and Drupal**. Additionally, I have experience working with **ReactJs** and **Node (NestJS)**.
- Experienced in **Search Technologies**, including ElasticSearch, Lucidworks, and Apache Solr.
- I am well-versed in common web application **Security** concerns and **Vulnerabilities**.
- I have experience in direct **Client Communication** for requirements gathering, understanding bugs and conducting demos of developed features.
- Experienced in **SDLC** phases related to Design, Development, Deployment to Production Support.
- I possess solid experience with **Agile** development tools like JIRA and well-versed in all **Scrum** methodology phases: SPM, standup, review, retro, and backlog grooming.
- I am deeply passionate and dedicated to my work, enjoying communication with individuals at various technical levels. I love learning, exploring new ideas, and collaborating with teams to develop innovative strategies while constantly seeking fresh knowledge.

## Technical Skills:

<b>Backend</b>	PHP, Laravel, Drupal, Yii2, Node(NestJS)
<b>Frontend</b>	Javascript, JQuery, React, Angular, CSS, Bootstrap
<b>Database</b>	Mysql, Postgres
<b>Search</b>	Elastic Search, Lucidworks, Apache Solr

University of the Punjab	B.Sc. (Math & Physcis)	2010 - 2012	538/800

## Experience Details:

---

### **Systems Limited as Principal Development Consultant [Jan 2020 - Present] [Pakistan]**

Worked on PHP Laravel, Drupal, AngularJS and ElasticSearch. Responsible for direct client interaction, gathering requirements, and providing technical solutions..

#### **Projects:**

- Ta3mal - Job Portal developed in Laravel, ElasticSearch and Angular
- Visionet Site (Revamp) - Developed in headless Drupal and Angular
- Partner Linq - Developed in Drupal

Systems Limited has its parent company in the U.S. called **Visionet Systems** which brings business for Systems Ltd. While working Systems Ltd and Visionet Systems I have been working with International Companies as an outsource employee. Provided services to below companies:

- **Saudi Telecom Company as Drupal Architect [April 2023 - Present] [Saudi Arabia]**

In my current role, I am working on a Drupal Developer Portal connected with APIgee edge. My main responsibility revolves around introducing new ideas and concepts to enhance the Developer Portal.

#### **Project:**

- Developer Portal - Developed in Drupal and Apigee Edge
- **Party City as Software Developer [Sep 2022 - Dec 2022] [United States of America]**

I worked on a short-term assignment where I primarily focused on PHP and JavaScript development.

#### **Project:**

- MapBox Integration - ES6 and integration with MapBox
- **Regeneron as Search Engineer [Jun 2020 - Sep 2022] [United States of America]**

Worked on Search Applications developed in Lucidworks Fusion and Apache Solr. As part of my role, I was responsible for gathering requirements from clients, assessing their feasibility, and leading the development process towards creating demos and presentations.

#### **Projects:**

- IOPS ESearch - Developed with Lucidworks and Solr based on Index/Query pipelines.
- Covid ESearch - Developed with Lucidworks and Solr based on Index/Query pipelines.
- BioRegistry - Developed with Lucidworks and Solr based on Index/Query pipelines.

### **Coeus Solutions as Senior Software Engineer [Jul 2014 - Dec 2019] [Pakistan]**

My primary focus was on developing web applications using PHP Laravel. I gained extensive experience in this area, while also gaining some exposure to AngularJS. In my role, I was responsible for working on various projects and products, where my tasks involved designing, architecting, and developing web solutions to meet the specific requirements of each project

#### **Projects:**

- Bravo - Developed in Laravel and Angular, worked as backend Dev
- RunAO - Developed RestApis for mobile app in Laravel
- House Pilot - Real Estate application developed in Laravel
- Participaid - Charity Application developed in Laravel

While working with Coeus Solutions, I provided services to companies in Germany i.e.,

- **eKomi as Software Engineer [Jul 2016 - Jul 2019] [Germany]**

At eKomi, I worked on several web applications based on PHP Laravel. eKomi, being a feedback company, provided me with valuable experience of product development..

#### **Projects:**

- Smart Review Requests - Notify customers to submit feedback of products and shops
- Smart Feedback Form - Customize form builders to make feedback forms
- Marcapo App - Background jobs to send email to shop owners about feedback stats
- **MetaDesign as Software Engineer [Apr 2015 - Jun 2015] [Germany]**

During my time at MetaDesign, I had the opportunity to work on a Yii-based product

#### **Projects:**

- BMS - A complete brand management system developed in Yii
