PROJECTS

Few of my projects which will give my knowledge reflection are mentioned below for your kind reference.

Vivya Cards — People need to connect, engage, and work together, no matter what the circumstances may be. Entrepreneurs, salespeople, marketers, and other business people need an app to exchange their contact details for further networking and nurturing. In this case, Vivya Cards would be a handy tool as it no longer requires users to carry business cards in their wallet anymore.

Features:

- Take a picture using the Vivya app's camera
- Automatically saves the contact to your device
- So, no need to waste time on manual data entry
- Our unique features
- Scans within a fraction of a second
- Stores the contact details instantly
- Translate business cards into 8 different languages
- Available on both Android and iOS
- User-friendly design
- Fast and accurate functionality

Technologies Used: iOS, Android, React native, WebApi. <https://>
