TECHNICAL STACK

FLUTTER SDK

- The Flutter SDK is the software development kit that includes everything you need to build Flutter applications, including the Flutter framework, Dart compiler, and libraries.

STATE MANAGEMENT

- Flutter provides several options for state management, including the built-in stateful widgets, the Provider package, and the BLoC architecture.

INTEGRATION WITH RESTFUL APIS

- Flutter can easily integrate with RESTful APIs using the Dart http package to fetch data from a server and display it in the app.
