## PROJECTS

2021

### HANDY

*Alexandria university - graduation project*

an e-commerce application for only handmade products.

- The graduation project was an e-commerce application that sells only handmade products.
- It was made using (Flutter/dart - Firebase).
- My roles : coding- UI - logo - backend (firebase).
- I've learned a lot from this project because I faced many problems as it was my first project that require a lot of code, work, problem-solving, and more.
- I was responsible for all of the code, UI, firebase, logo, and images.

2021

### REACT WEBSITE

*Scandiweb*

An e-commerce website built using (React.js, CSS, and graph QL)

- It was a test for me after learning the React.js framework.
- It was the first website that I've worked on.
- It was an e-commerce website.
- I've learned a lot from that project as It made me learn Graph QL.
- It was the first time to use Figma, react-router, redux, and enlist packages.
