Khawaja Muhammad Ahsen

357, Block J, Valancia Society, Lahore | *+92 333 4783545* | ahsenkh@gmail.com

A software engineer who is thorough, and responsible. I like to write quality code which follows good coding conventions. Refactoring the code gives me satisfaction.

EXPERIENCE

Motive (formerly KeepTruckin), Lahore — *Software Engineer*

MARCH 2020 - PRESENT

Working as a frontend lead on one of the pods in Safety vertical of the web dashboard. It primarily aims to bring a safer driving experience, by logging unsafe driving events, assigning drive scores, along with other dashcam utilities.

- Developed and maintained features using Angular (TypeScript), HTML/SCSS, Ant Design, with major focus on code reusability.
- Converted Figma designs into high-quality code while ensuring responsiveness of the web pages.
- Led a team of developers in an agile environment.
- Additional lead responsibilities include; project estimations, product/design communication, sprint planning, scrum master rotation.
- Had the highest number of code refactoring percentage across webapp.
- Actively contributing towards new resource hiring, by taking interviews.

AlmusNet - Techlogix, Lahore — *Senior Software Engineer*

JULY 2017 - MARCH 2020

Worked as a frontend developer on CampusOnCloud; a cloud based campus management web application. It facilitates the students, teachers, and staff in their university lifecycle.

- Developed and maintained features using AngularJS, HTML/CSS, and Kendo-UI, with major focus on code reusability.
- Converted Justinmind, and Adobe XD designs into high-quality code.
- Initial phase of mobile application development.

CareAxiom, Lahore — *Intern*

JUNE 2016 - AUGUST 2016

Responsible for the automation of functional test cases for Node.js application, using Mocha test framework; Sequelize as ORM.

- Test cases written using chai.js and should.js framework; sinon.js for stubs.
- Test case coverage report generated using istanbul.js.
