## FULL-STACK WEB DEVELOPER

Full-Stack developer with 3 years of experience in **Node.js, Express, Socket.IO, MySQL, MongoDB, HTML, CSS, JavaScript, Bootstrap, and JQuery**. Skilled in React.js with Redux state management and experienced in **Nest.js** and **Typescript**. Proficient in problem-solving and quick learning. Strong communication and interpersonal skills. Expertise in system analysis, **relational and non-relational databases, authentication, middleware, Restful APIs, SSL error handling**, and **SEO** principles. Proficient in Git for version control. Delivering high-quality web apps with clean code. A team player with excellent problem-solving abilities, quick learning skills, effective communication, and strong interpersonal skills.

## SKILLS

Node.js	MySQL	HTML5	Postman	Agile	problem-solving
React.js	MongoDB	CSS3	Error handling	Authentications	Jest
Express	Restful APIs	JavaScript	Docker	Design Patterns	Responsive
TypeScript	Redux	JQuery	GIT	Team Player	Quick learner

## EXPERIENCE

### Golden Click - Dubai UAE- Dec 2022 Jun 2023

#### Full-Stack web developer

-Created user-friendly websites, control panels, and interactive UIs using React and WordPress, delivering engaging experiences for users and efficient management capabilities.

-Successfully worked on various projects utilizing WordPress, React, and Node.js.

-Developed backends for front applications using Node.js, enabling secure data exchange and seamless integration with third-party services.

you can see many more project I have worked on at <https://goldenclick.ae/>

### Robotic mind -lattakia Sy - May 2021 Jun 2022

#### Full-Stack web developer

-Successfully worked on various projects using ASP.NET Core framework Optimized user interfaces and workflows, leveraging ASP.NET Core, to create user-friendly websites and control panels that improved user satisfaction by 25% and increased team efficiency by 30%.

-Developed a backend for mobile applications using ASP.NET Core, allowing secure data exchange and integration with third-party services.

-Created user-friendly websites and control panels using ASP.NET Core, providing seamless experiences for users and efficient management capabilities.

#### Accomplishments:

1. **Martendo 🚗** : E-commerce web app: I work on that project as backend developer

, I analyzed the system and created the MySQL database, built fast restful API 's , that have been used in flutter app and the website and created a secure authenticated backend with authenticated payments Gateways, connect the dashboard

(ASP.NET, MySQL, json , Javascript, bootstrap) <https://martendo.net/User/>

you can see many more project I have worked on at <https://robotic-mind.com/projects/>

### Full-Stack web developer

Talk to clients, understand the requirements of the project, analyze the requirements, draw the diagrams, build databases, hire the required team for the mission, send tasks for the team using management environments, hold the CI/CD process, and deal with payment gateways.

#### Accomplishments:

1. **Star-Liga**: Star Liga is an application for a neighborhood football league in the city of Latakia. Through the application, users can follow the league's news, teams, matches, results, and players. (**Node.js, sequelize , express**)

Source code: <https://github.com/mhmodjoney/star-liga-master/tree/main>

2. **mern-auth**: Minimal full-stack MERN app with authentication using passport and JWTs" project is a full-stack web application that combines various technologies to create a functional and secure application. Here's a summary of each technology used in the project:(**Node. js, React, Mongo DB, CSS3, Javascript, and bootstrap**) By combining these technologies, the project aims to provide a foundation for building a full-stack web application with user authentication and authorization capabilities.

back: <https://github.com/mhmodjoney/mern-auth-master/tree/main>

front: <https://github.com/mhmodjoney/client-mern-auth/tree/main>

3. **handy**: I developed a college project test e-commerce website using React for the front end, .NET Core with a RESTful API for the back end, and integrated Stripe for secure payment processing.

crash. It has real-time chat and Cpu users with auto messages to make a good user experience.

(**React.js, stripe , jwt ,API, .net(core)** ) <https://github.com/mhmodjoney/handy-back-AspCoreApi.git>

<https://github.com/mhmodjoney/handy-front-react.git>

---

## EDUCATION

### Tishreen University- Latakia Syria 2017 - 2022

Computer Science and Automatic control Engineering

---

## PERSONAL DETAILS

**Date of Birth:** 1/8/1999

**Marital Statue:** Single

**Nationality:** Syrian

---

## LANGUAGES

**Arabic:** Native

**English:** Fluent

---

## COMMUNICATION AND INTERPERSONAL SKILLS

Communication Skills Gained through working as a part of an integrated team in many workplaces
